

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

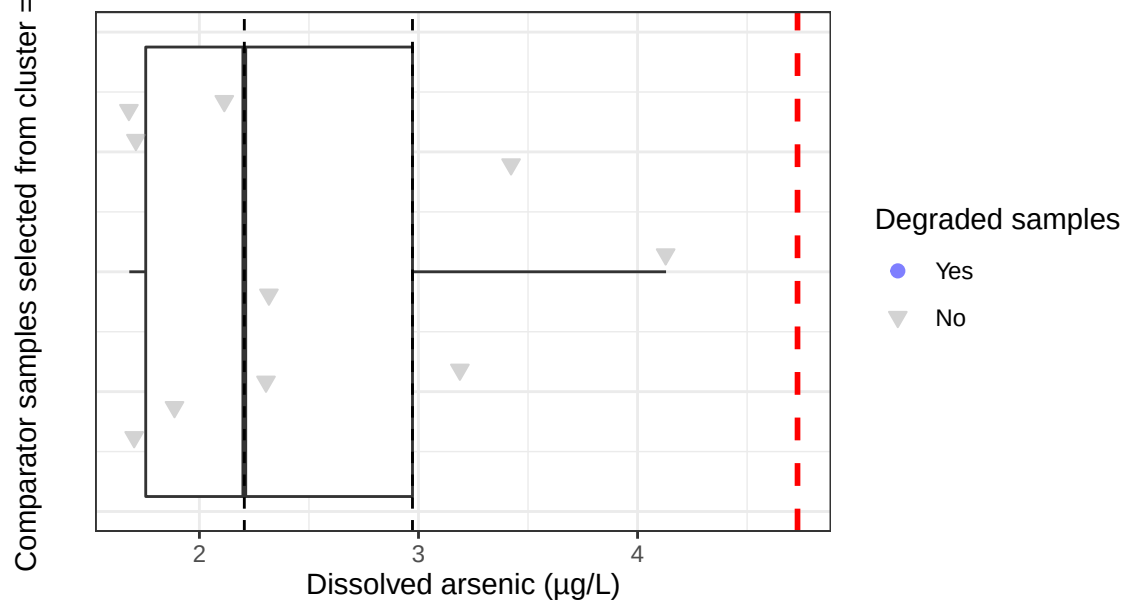

S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

902S01097: Co-occurrence line of evidence

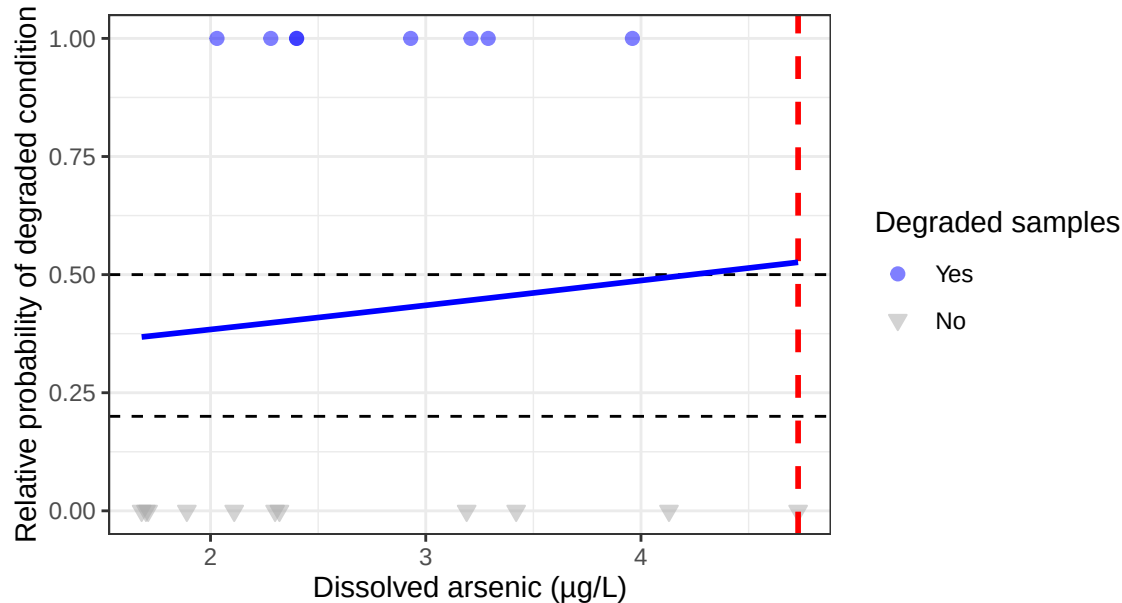

Observed stressor levels consistent with impairment where and when it occurs?

samples with higher MMIhybrid scores and paired Arsenic_f_ug_L data (n = 10).
Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

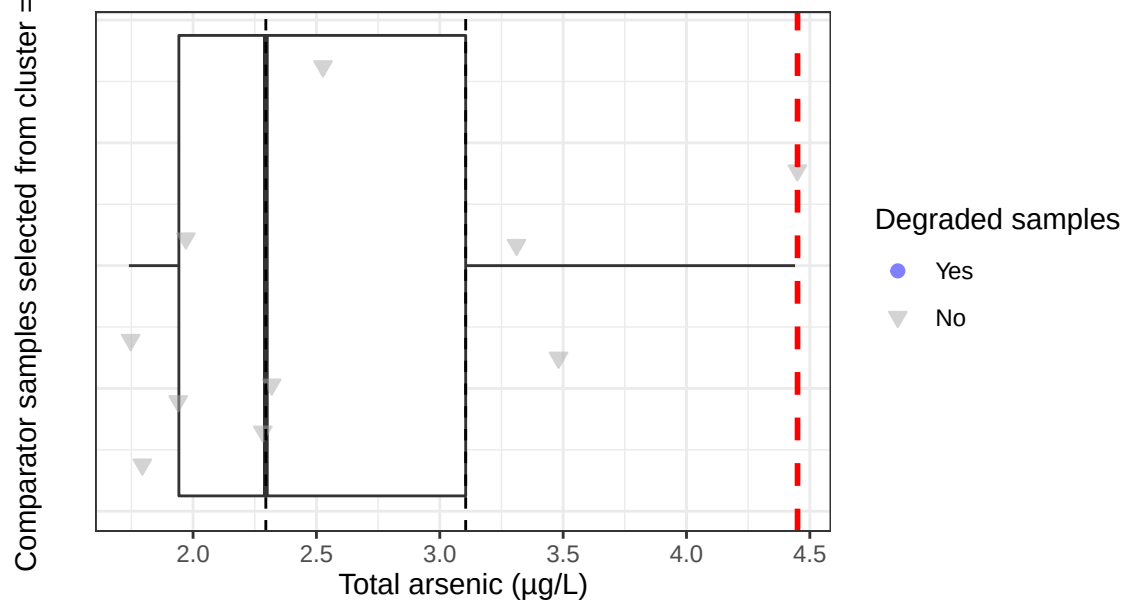

Are stressor levels sufficient to explain the observed impairment?

All comparator samples with MMIhybrid and paired Arsenic_f_ug_L data (n=19).
Score = 1.

902S01097: Co-occurrence line of evidence

Are observed stressor levels consistent with impairment where and when it occurs?

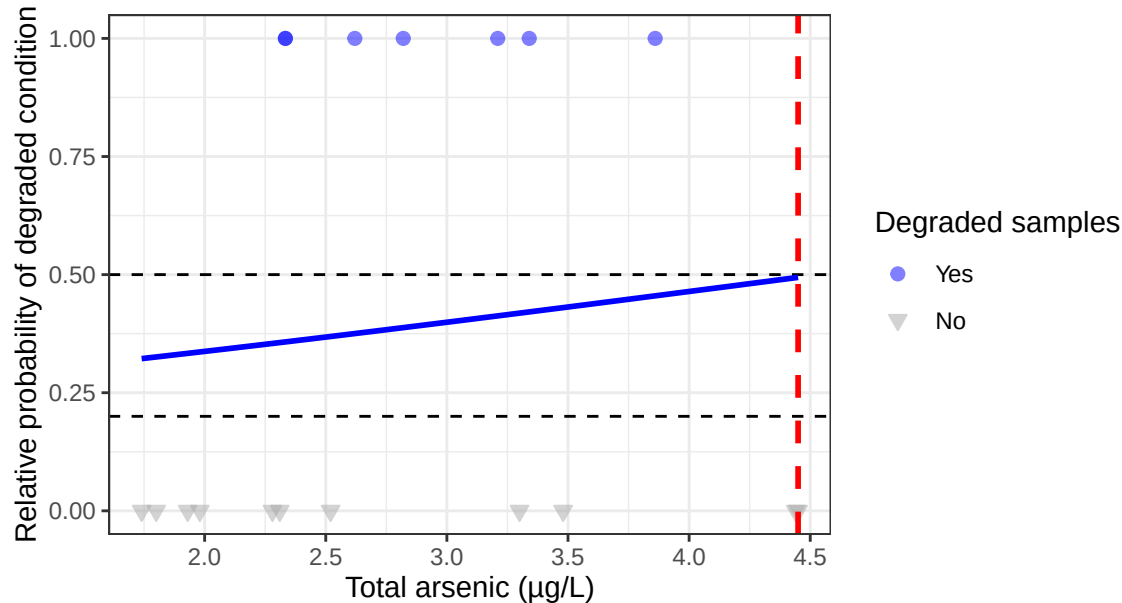

Comparator samples with higher MMIhybrid scores and paired Arsenic_uf_ug_L data (n = 10).

Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

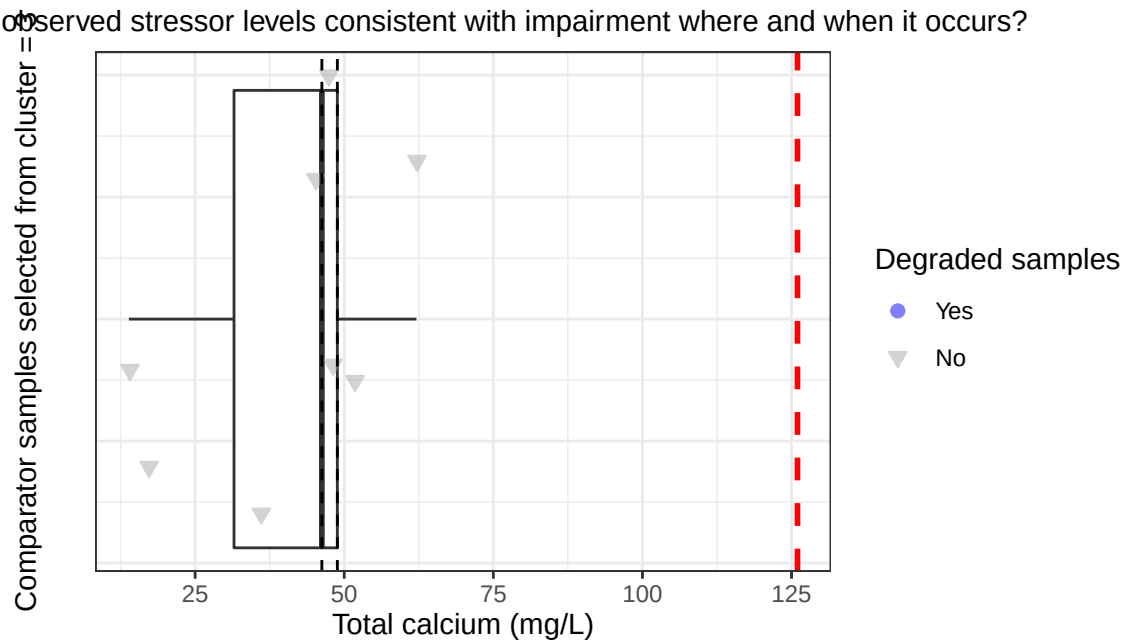

Comparator samples with MMIhybrid and paired Arsenic_uf_ug_L data (n=18).

Score = 0.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

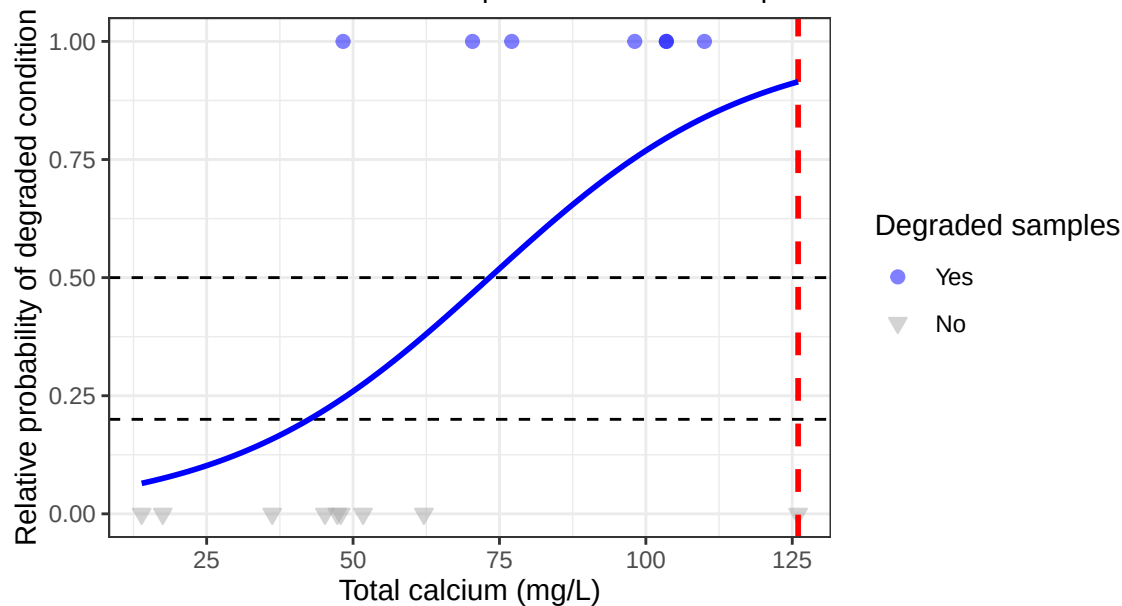

Comparator samples with higher MMIhybrid scores and paired Calcium_uf_mg_L data (n = 8).

Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

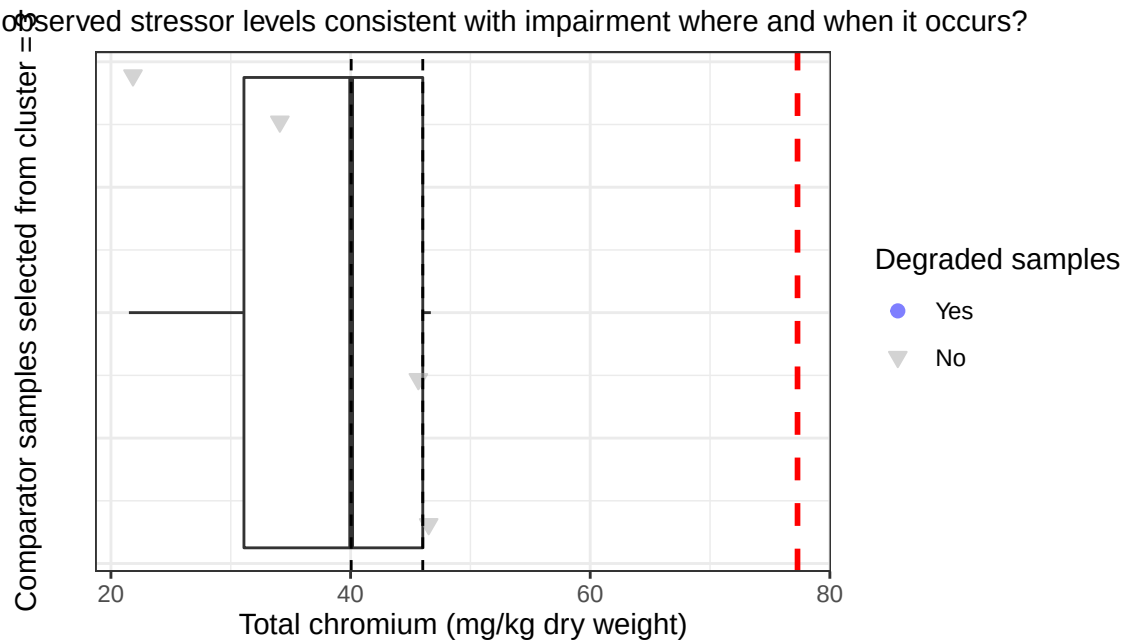

Comparator samples with MMIhybrid and paired Calcium_uf_mg_L data (n=16).

Score = 1.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

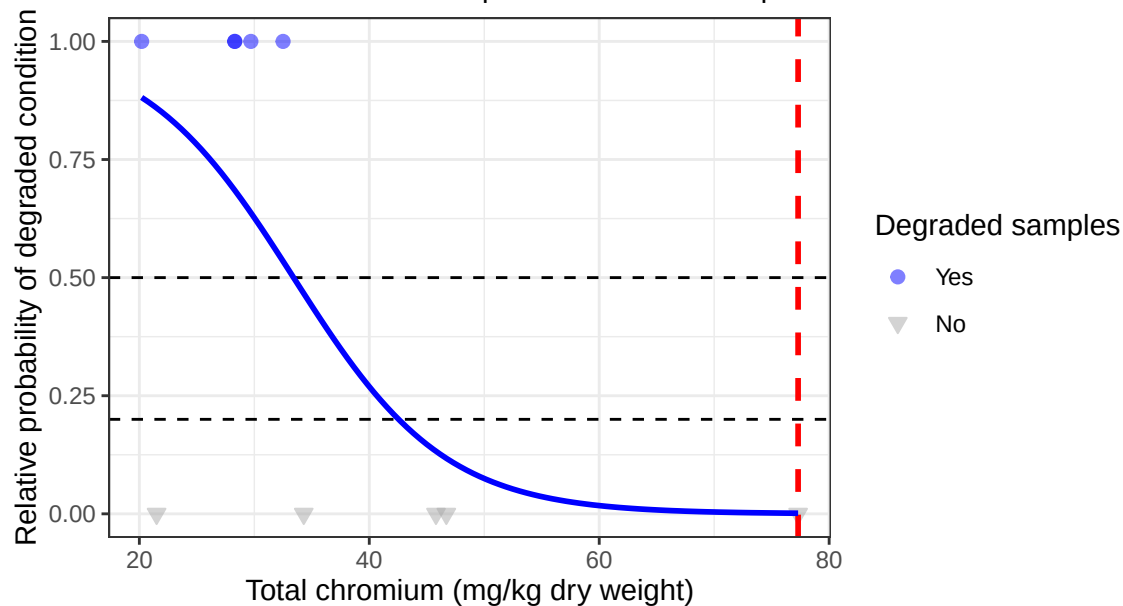

with higher MMIhybrid scores and paired Chromium_tot_mg_kg_dw data (n = 4).

Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

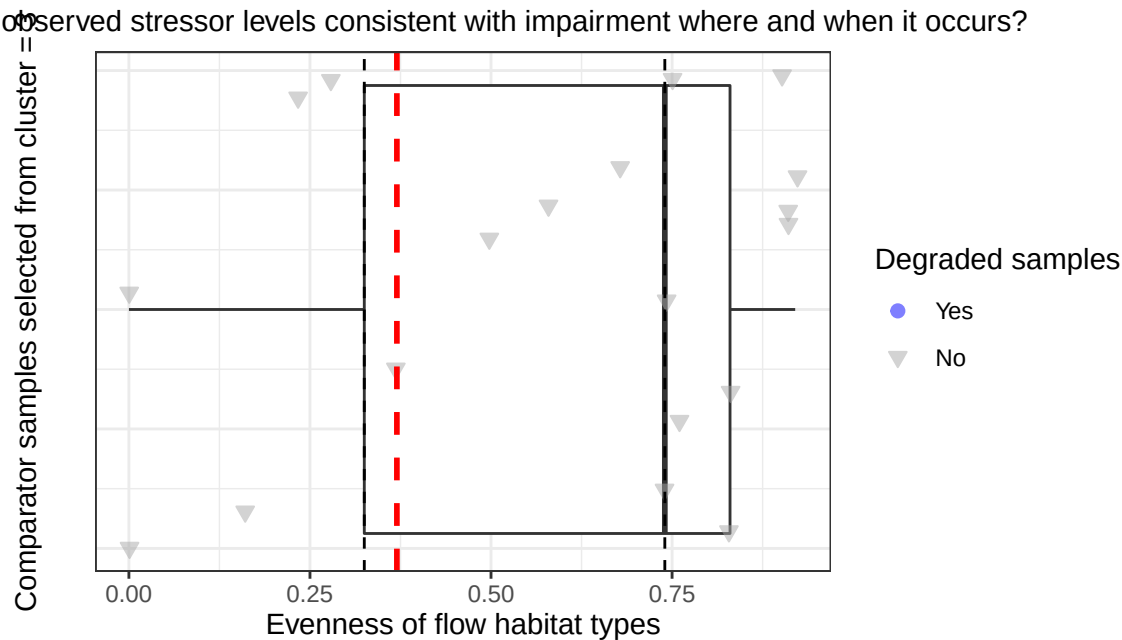

for samples with MMIhybrid and paired Chromium_tot_mg_kg_dw data (n=10).

Score = -1.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

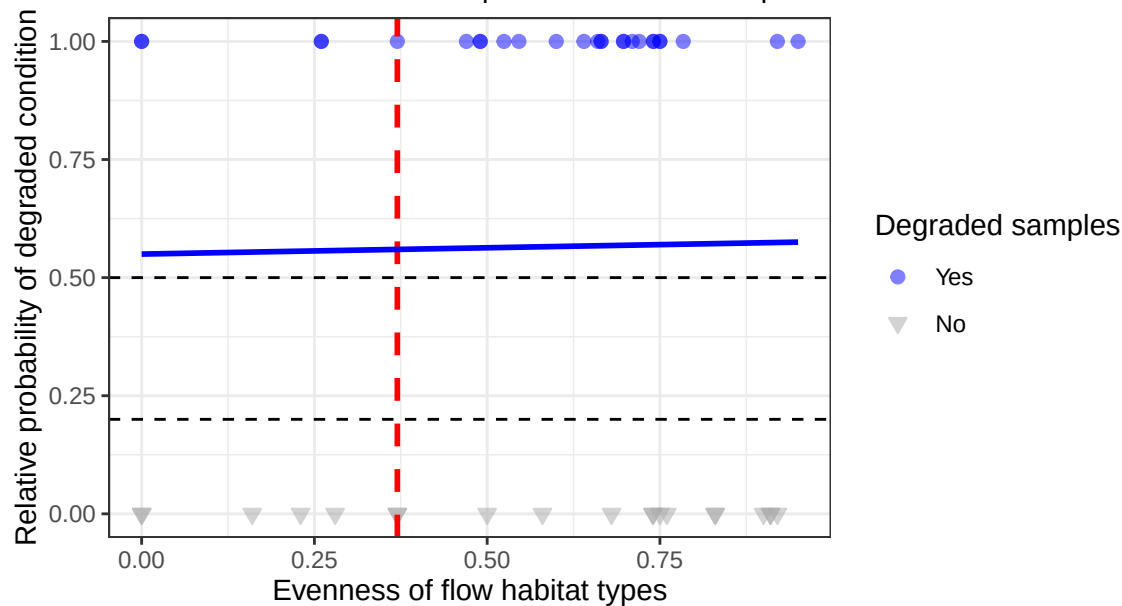

Comparator samples with higher MMIhybrid scores and paired Ev_FlowHab_score data (n = 19).

Score = 0.

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

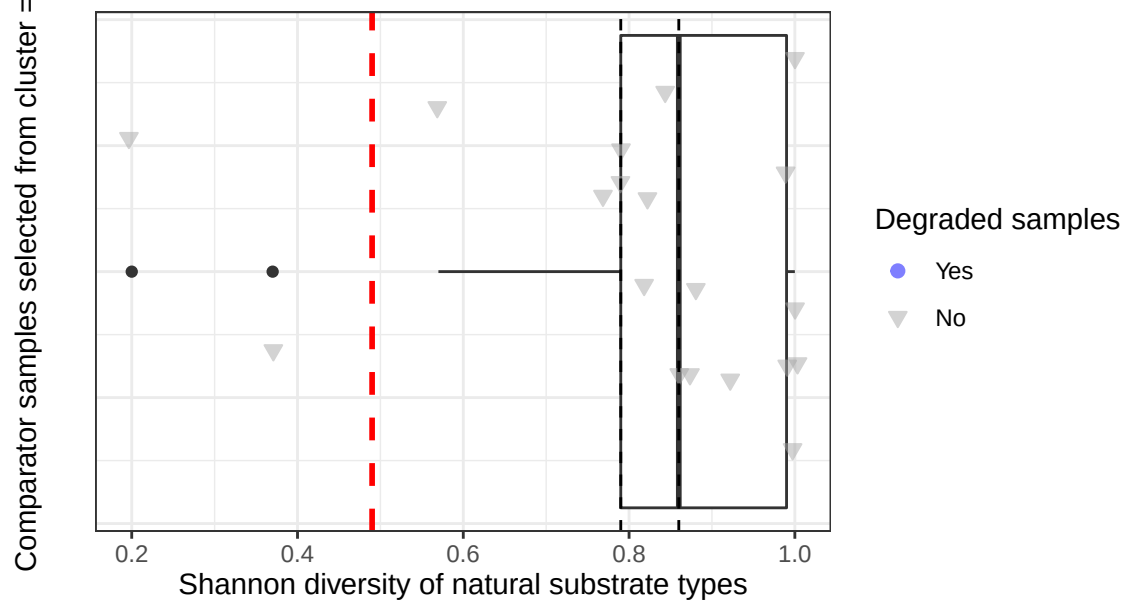

Comparator samples with MMIhybrid and paired Ev_FlowHab_score data (n=46).

Score = 1.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

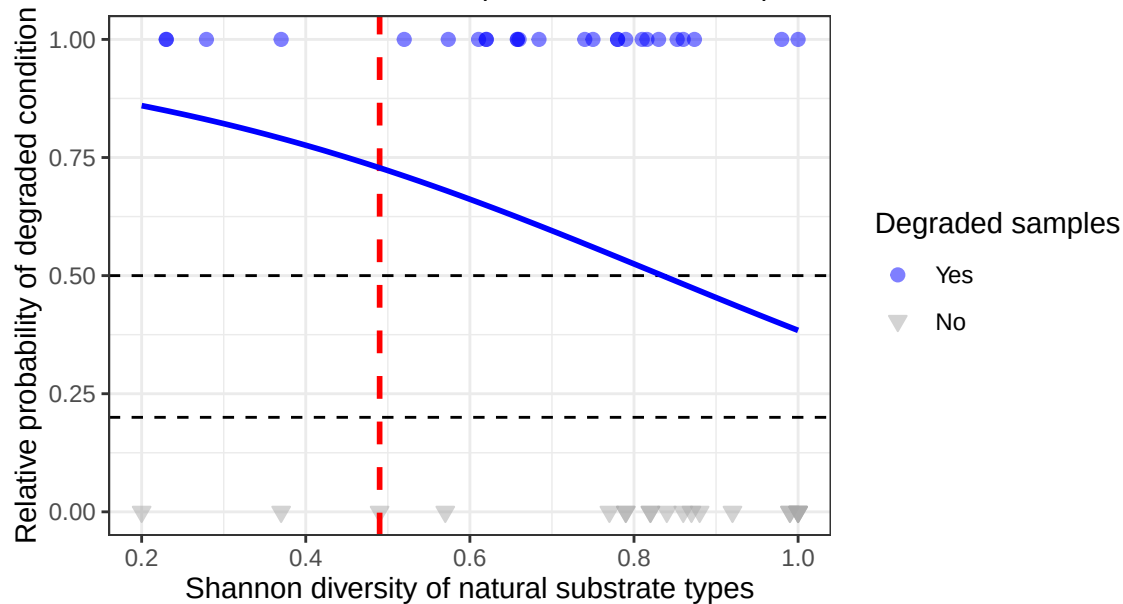

Comparator samples with higher MMIhybrid scores and paired H_SubNat_score data (n = 19).

Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

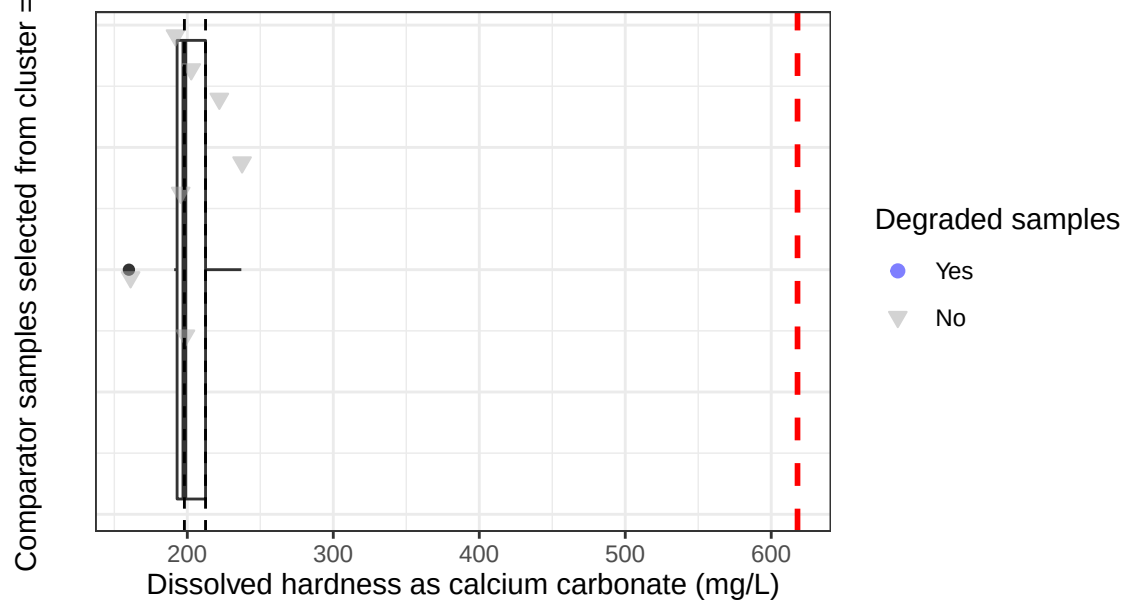

Comparator samples with MMIhybrid and paired H_SubNat_score data (n=46).

Score = 1.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

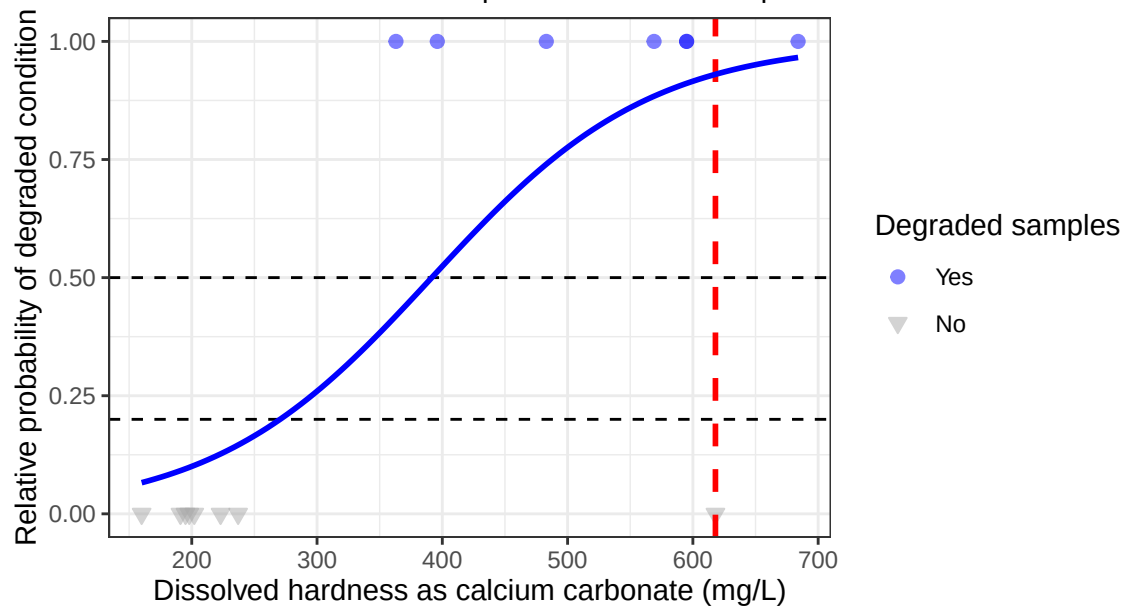

h higher MMIhybrid scores and paired Hardness_CaCO3_f_mg_L data (n = 7).

Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

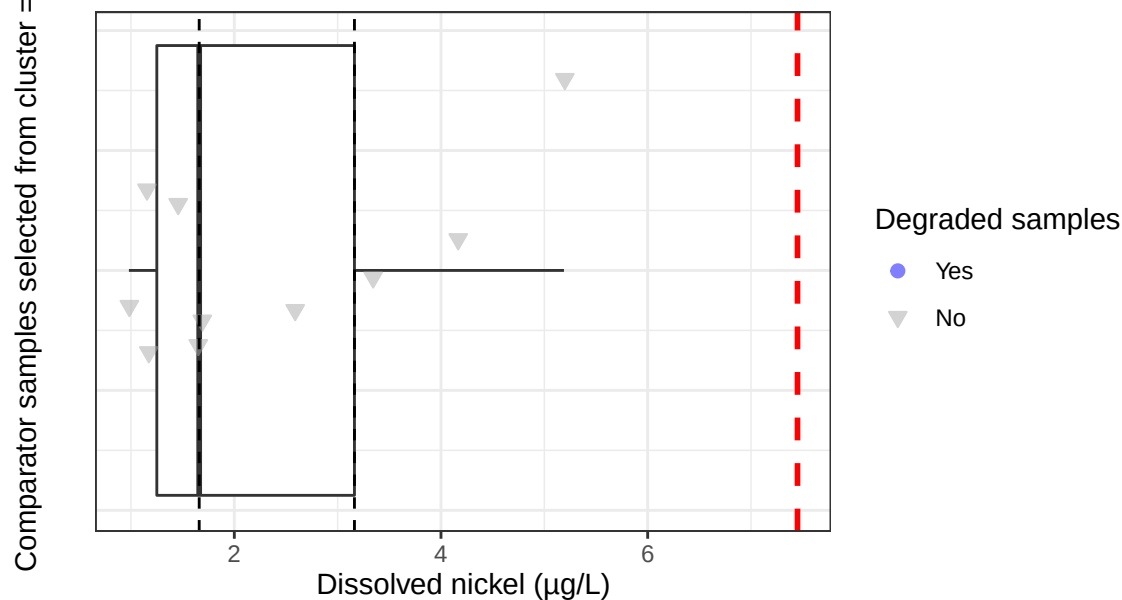

or samples with MMIhybrid and paired Hardness_CaCO3_f_mg_L data (n=15).

Score = 1.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

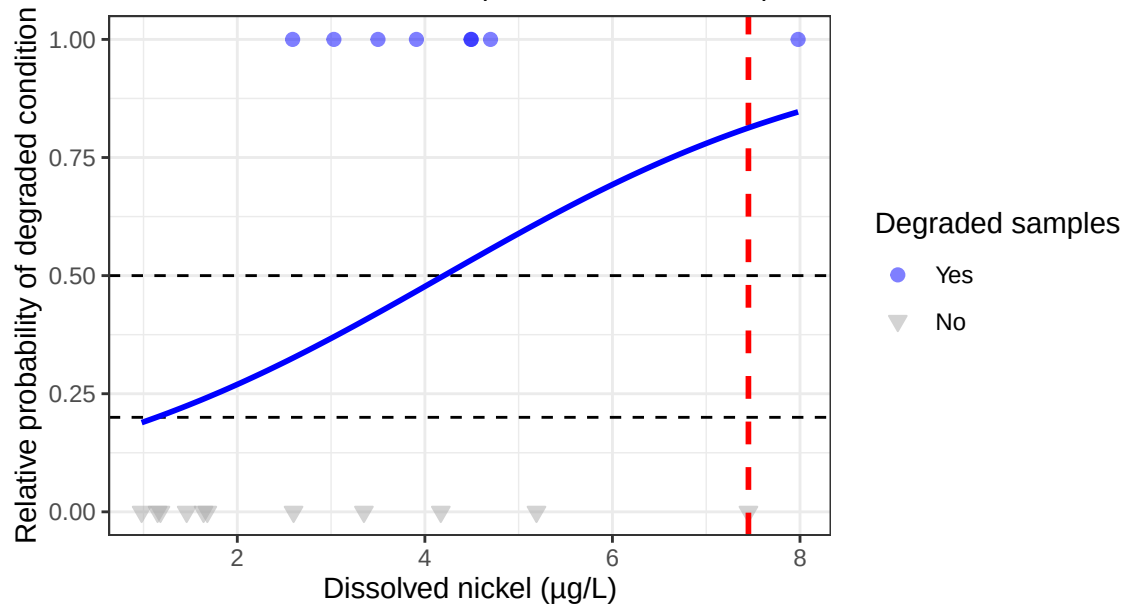

samples with higher MMIhybrid scores and paired Nickel_f_ug_L data (n = 10).

Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

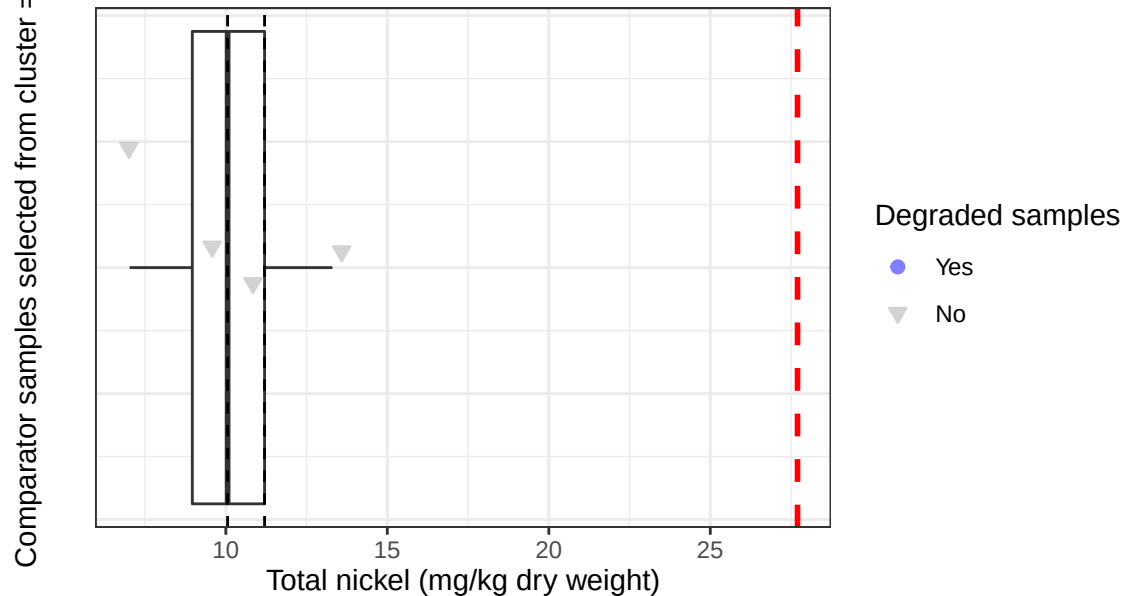

All comparator samples with MMIhybrid and paired Nickel_f_ug_L data (n=19).

Score = 1.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

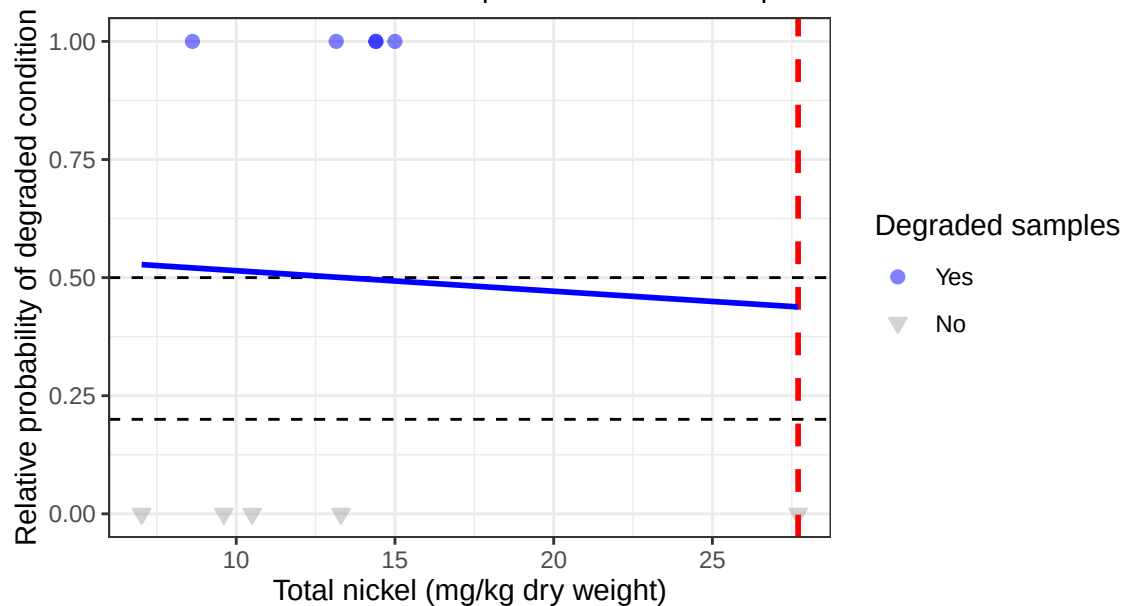

Comparator samples with higher MMIhybrid scores and paired Nickel_tot_mg_kg_dw data (n = 4).

Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

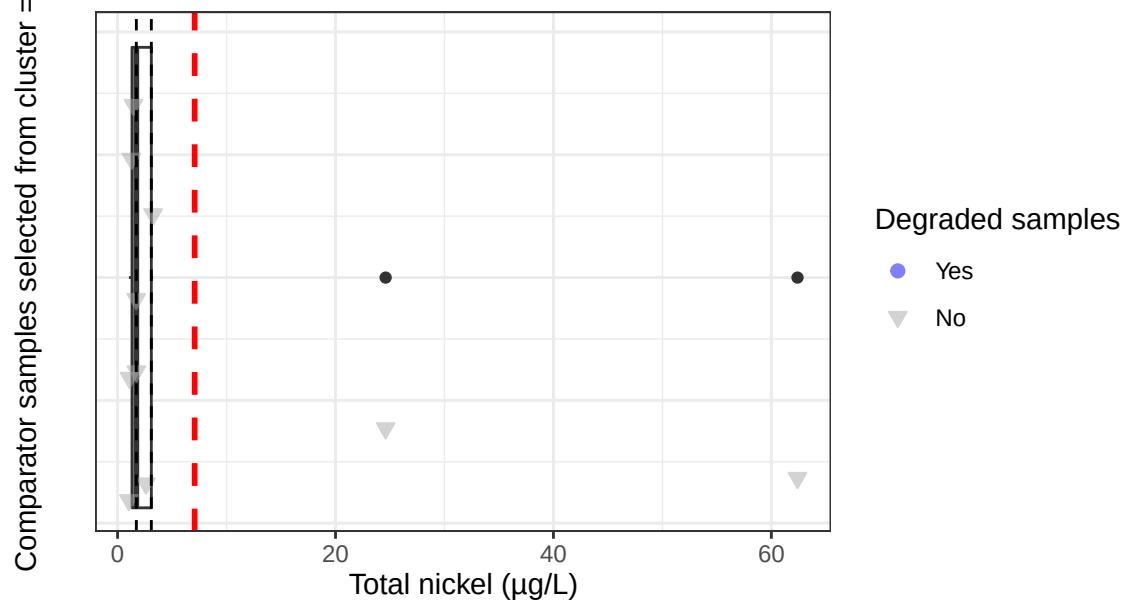

Comparator samples with MMIhybrid and paired Nickel_tot_mg_kg_dw data (n=10).

Score = 0.

902S01097: Co-occurrence line of evidence

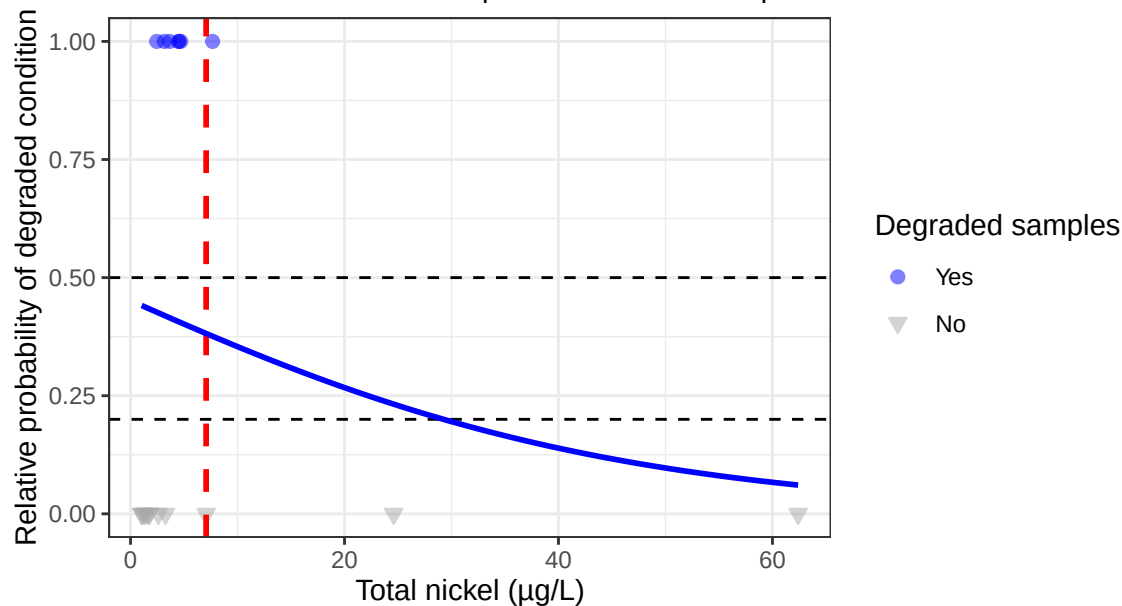

Observed stressor levels consistent with impairment where and when it occurs?

samples with higher MMIhybrid scores and paired Nickel_uf_ug_L data (n = 10).
Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

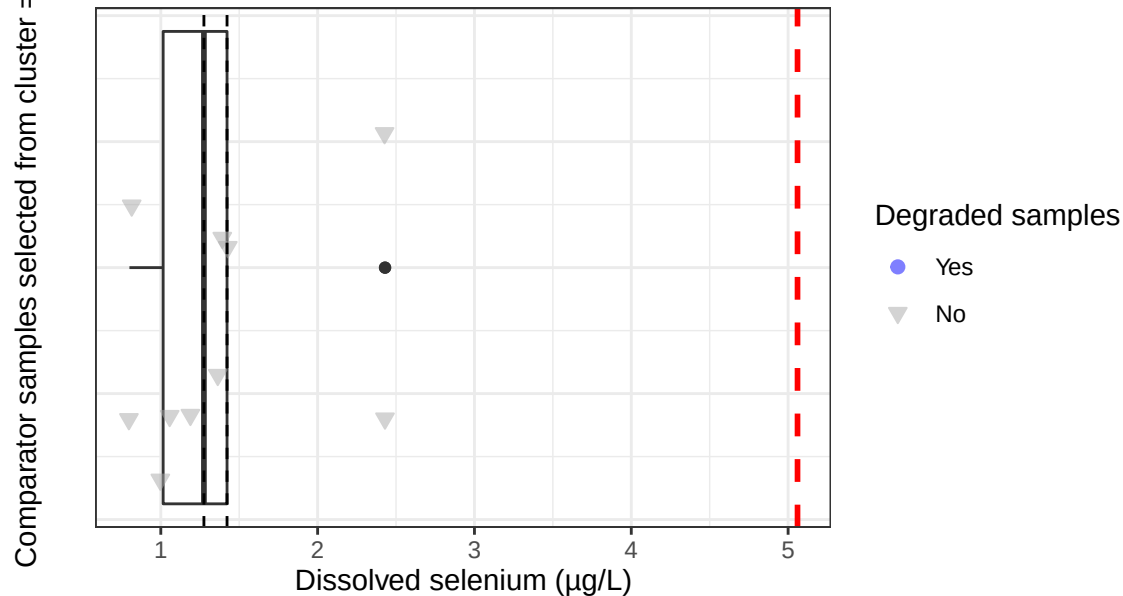

Are stressor levels sufficient to explain the observed impairment?

All comparator samples with MMIhybrid and paired Nickel_uf_ug_L data (n=18).
Score = 0.

902S01097: Co-occurrence line of evidence

Are observed stressor levels consistent with impairment where and when it occurs?

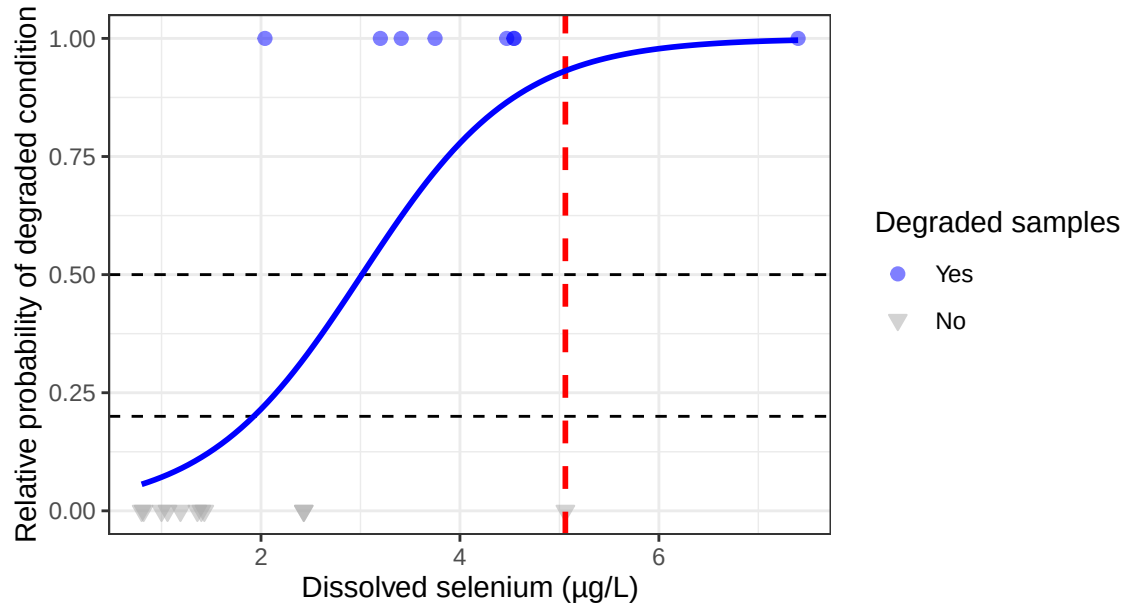

Comparator samples with higher MMIhybrid scores and paired Selenium_f_ug_L data (n = 10).

Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

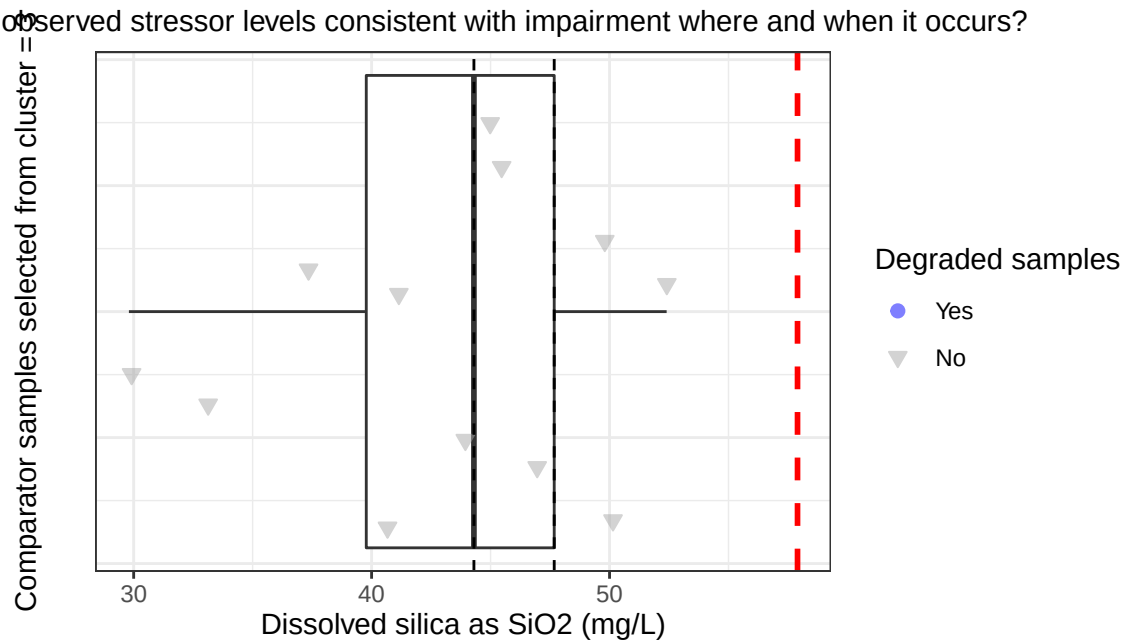

Comparator samples with MMIhybrid and paired Selenium_f_ug_L data (n=19).

Score = 1.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

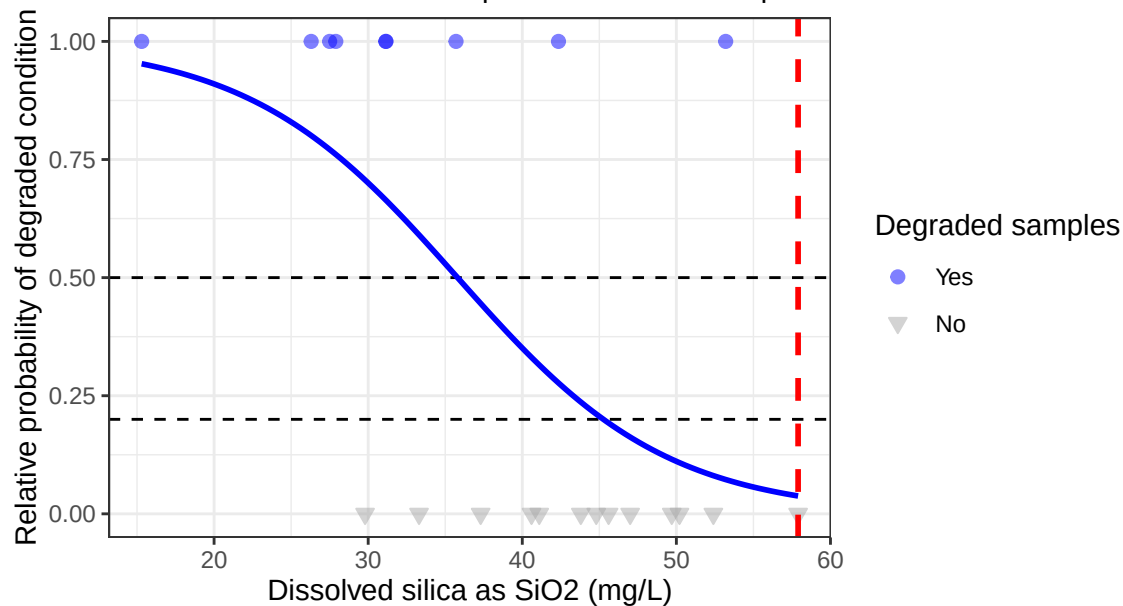

es with higher MMIhybrid scores and paired Silica_SiO₂_f_mg_L data (n = 12).

Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

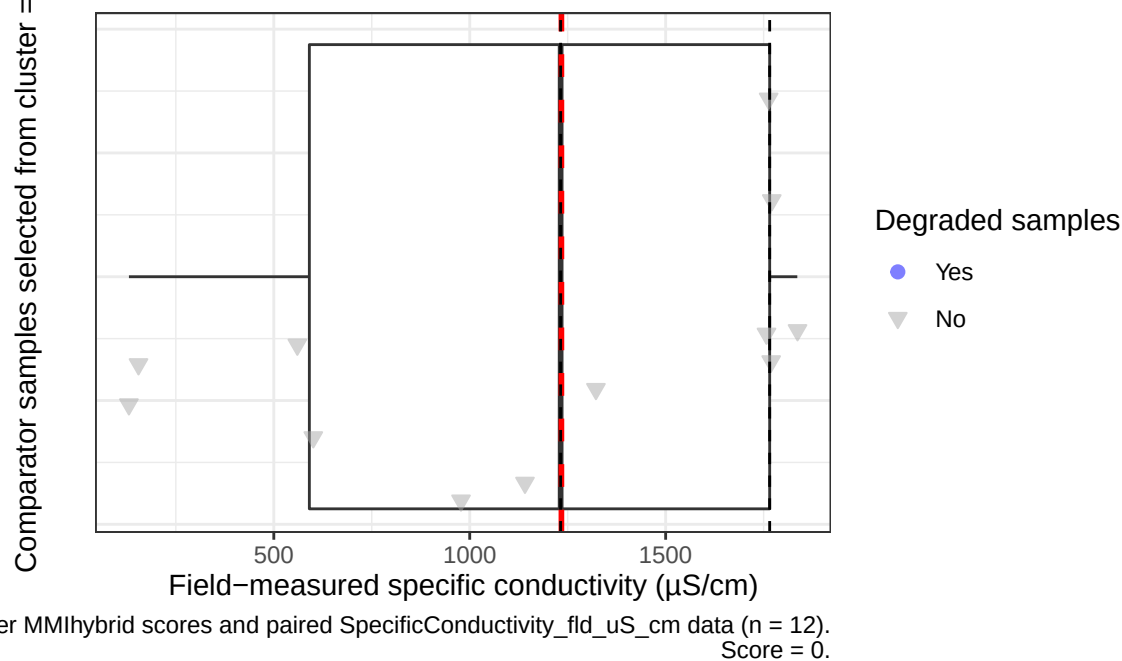

Comparator samples with MMIhybrid and paired Silica_SiO₂_f_mg_L data (n=22).

Score = -1.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?
