

902S01097: Co-occurrence line of evidence

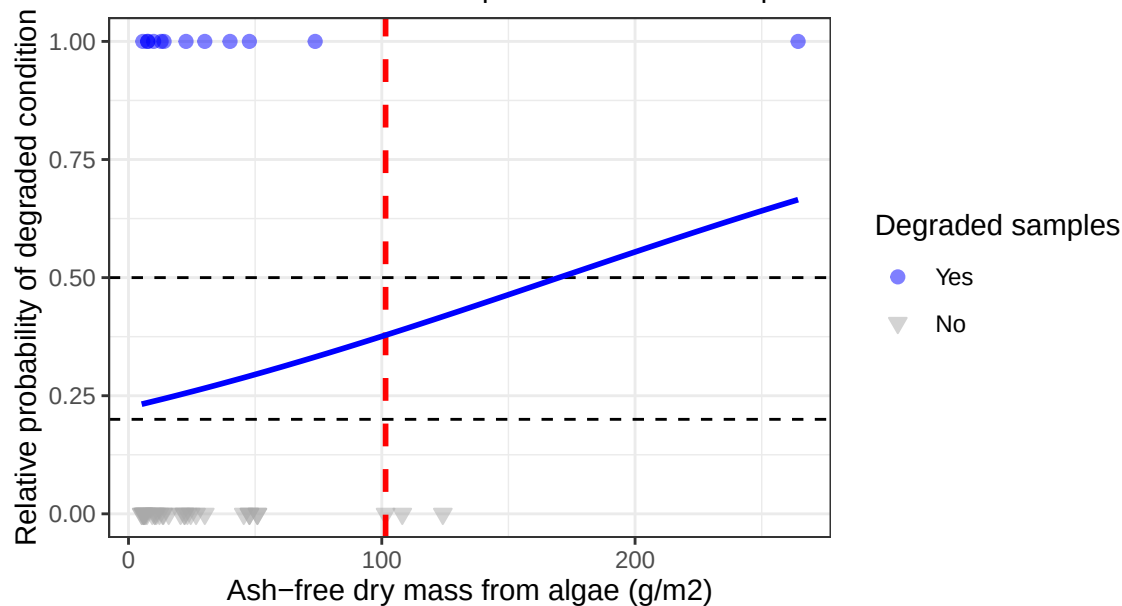

Observed stressor levels consistent with impairment where and when it occurs?

h higher CSCI scores and paired AFDM_algae_particulate_g_m2 data (n = 8).
Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

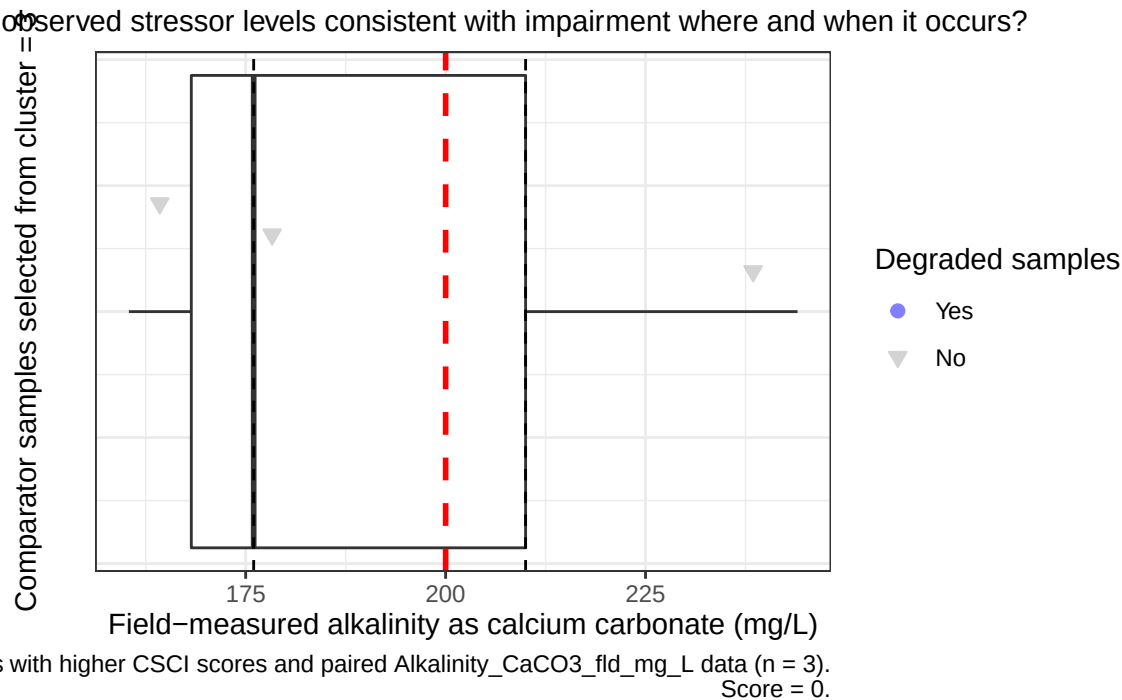

Are stressor levels sufficient to explain the observed impairment?

or samples with CSCI and paired AFDM_algae_particulate_g_m2 data (n=44).
Score = 0.

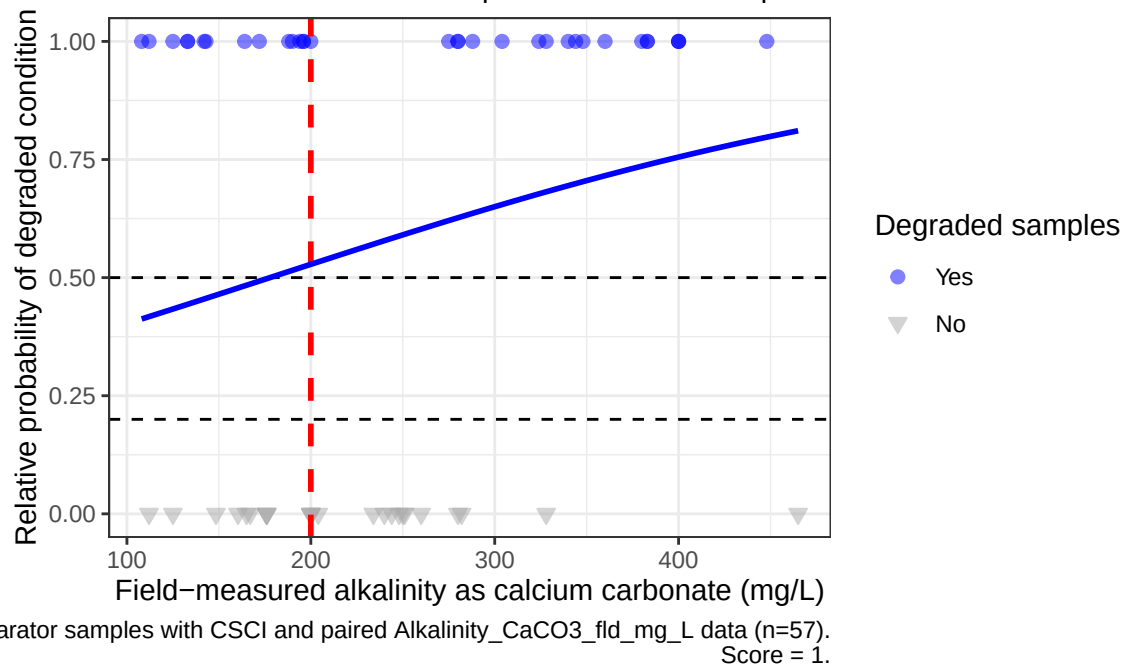

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

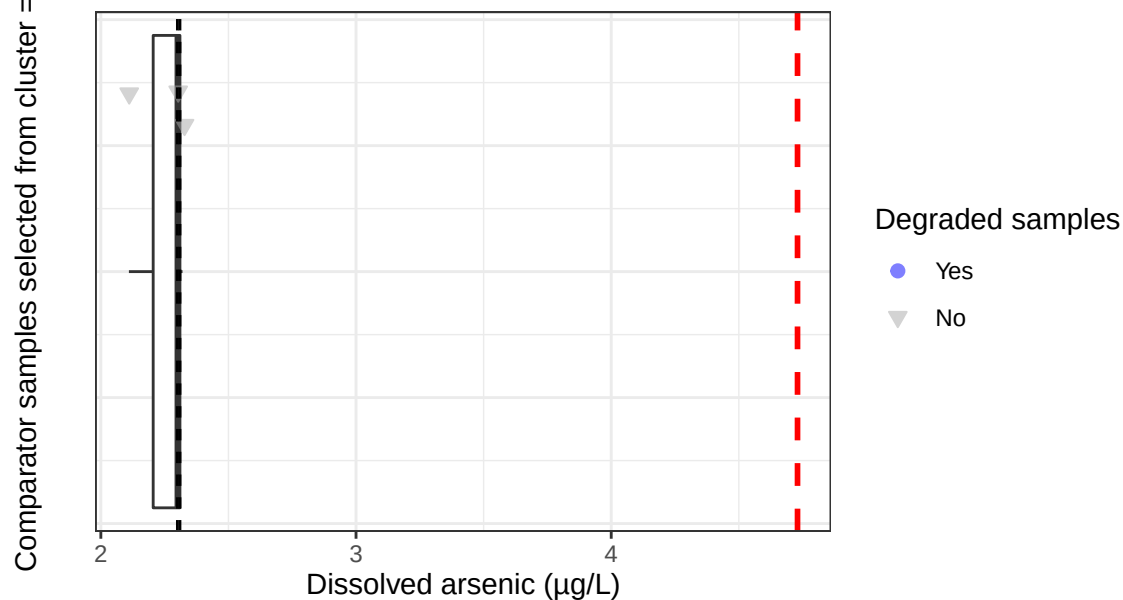

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

902S01097: Co-occurrence line of evidence

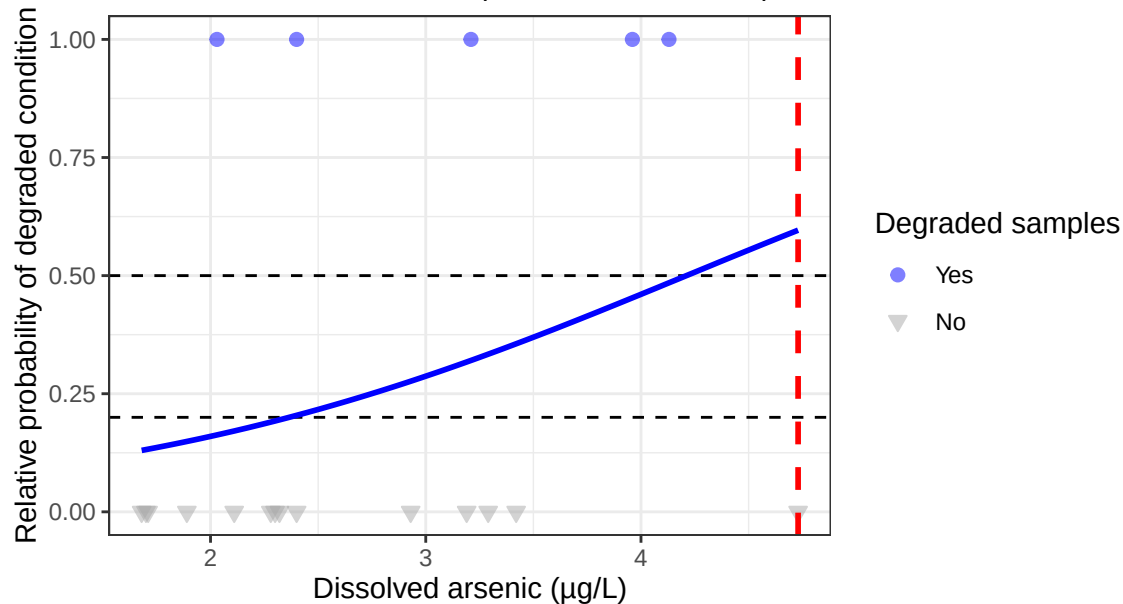

Observed stressor levels consistent with impairment where and when it occurs?

Comparator samples with higher CSCI scores and paired Arsenic_f_ug_L data (n = 3).
Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

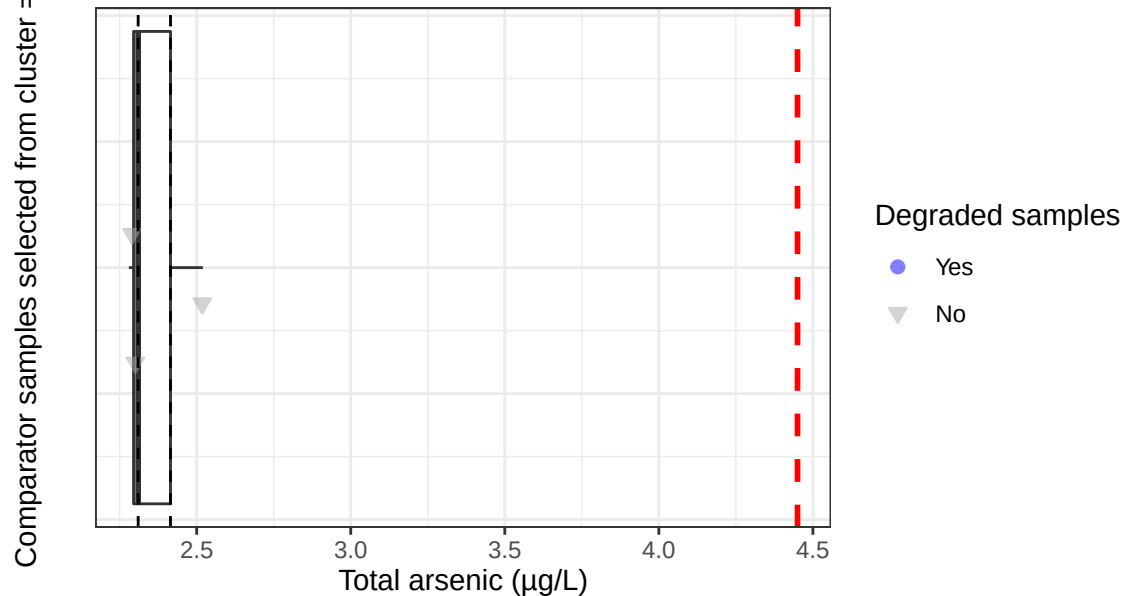

Are stressor levels sufficient to explain the observed impairment?

All comparator samples with CSCI and paired Arsenic_f_ug_L data (n=19).
Score = 1.

902S01097: Co-occurrence line of evidence

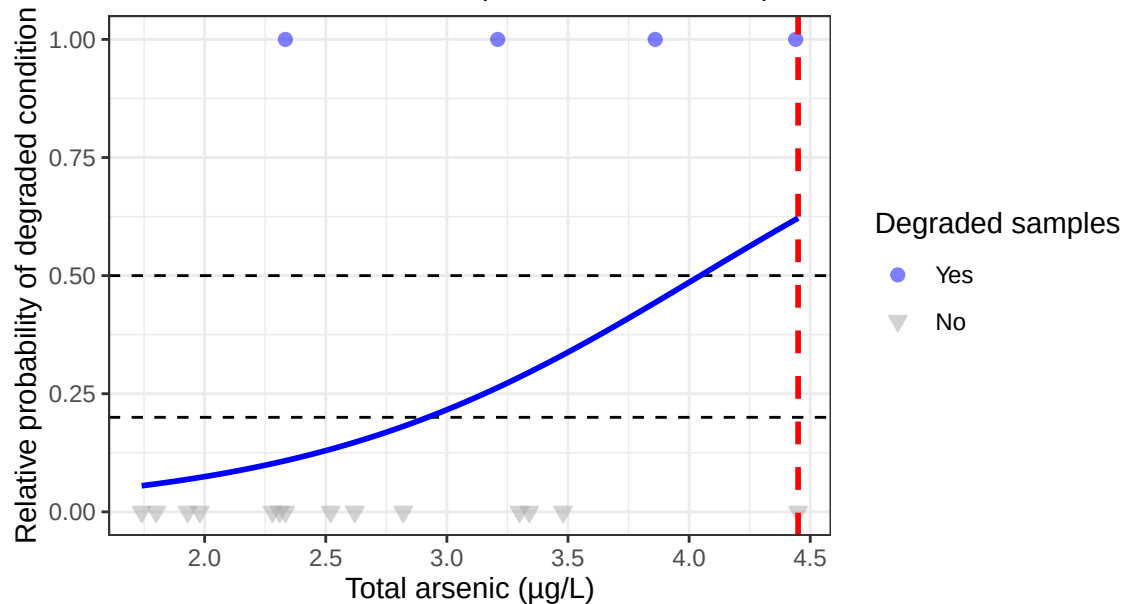

Observed stressor levels consistent with impairment where and when it occurs?

Comparator samples with higher CSCI scores and paired Arsenic_uf_ug_L data (n = 3).
Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

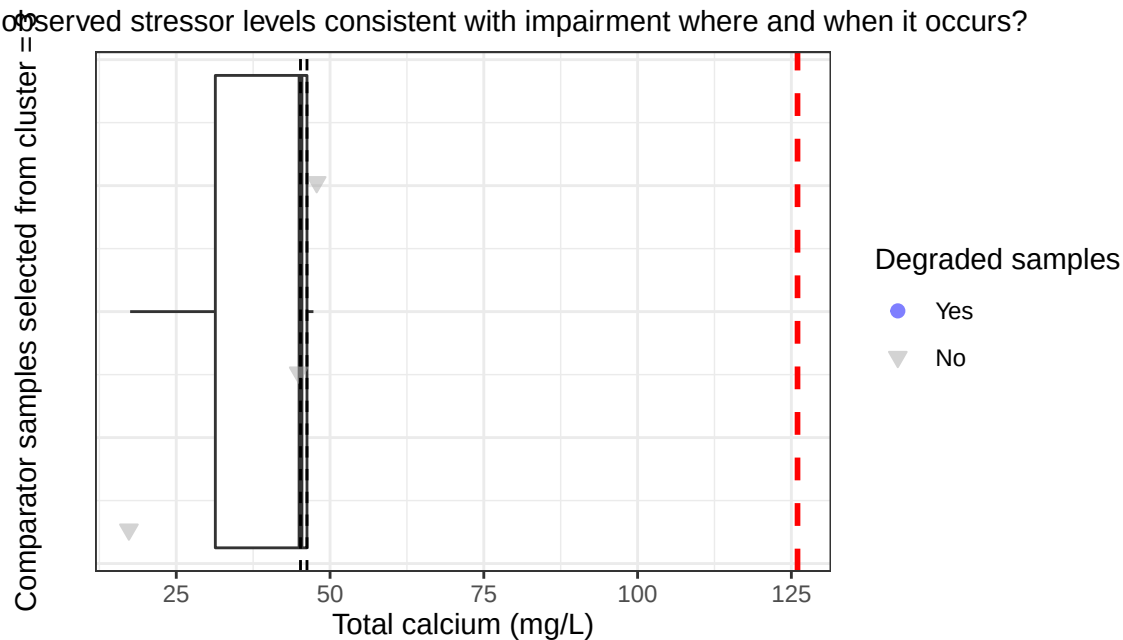

Are stressor levels sufficient to explain the observed impairment?

All comparator samples with CSCI and paired Arsenic_uf_ug_L data (n=18).
Score = 1.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

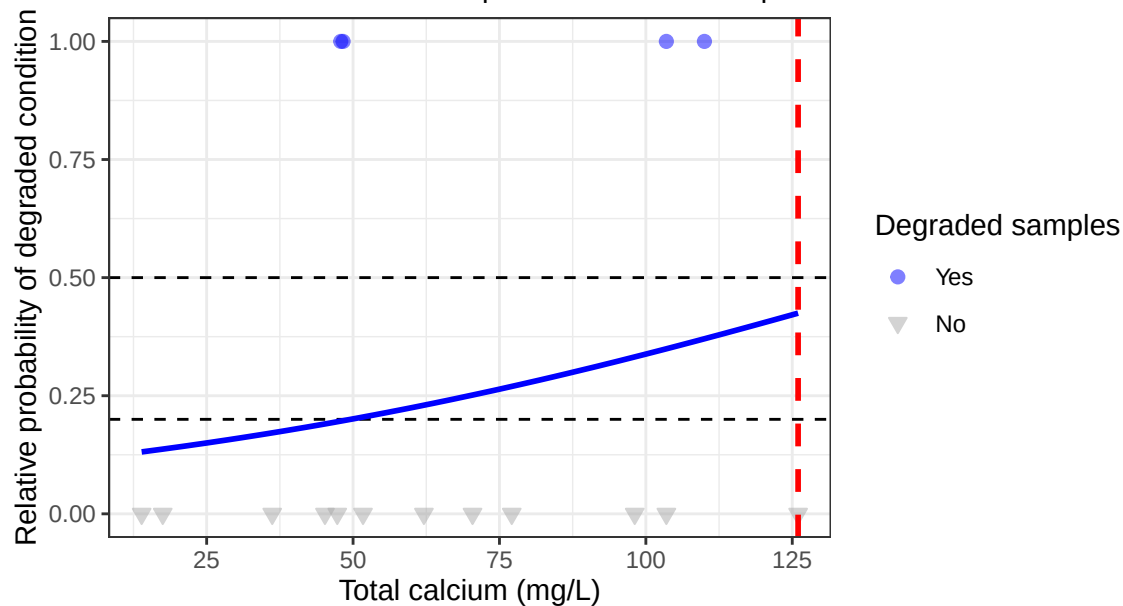

or samples with higher CSCI scores and paired Calcium_uf_mg_L data (n = 3).

Score = 1.

S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

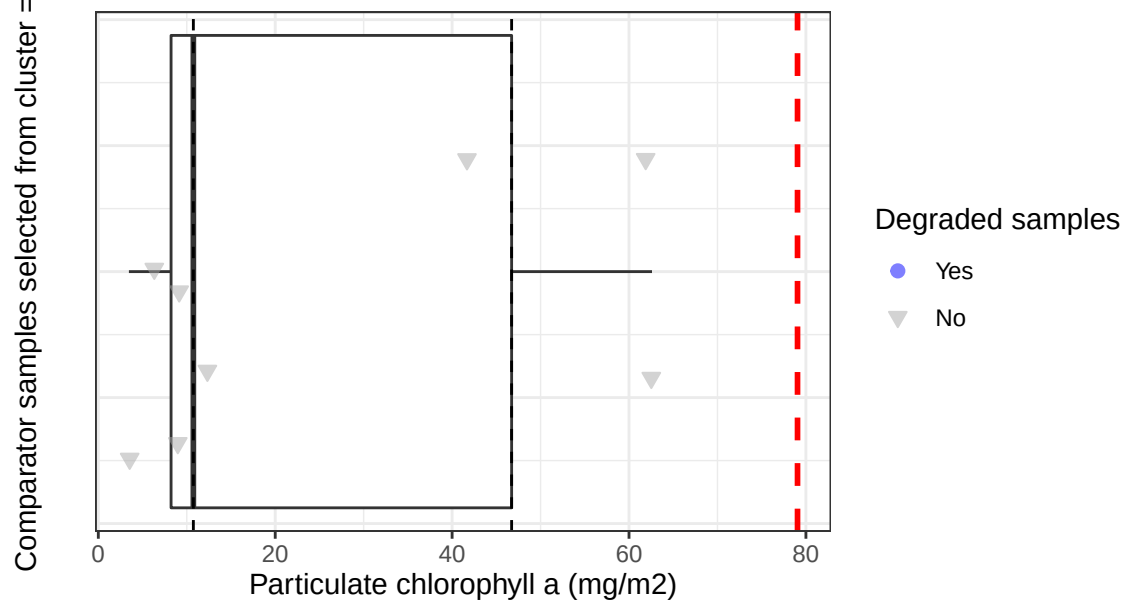

All comparator samples with CSCI and paired Calcium_uf_mg_L data (n=16).

Score = 0.

902S01097: Co-occurrence line of evidence

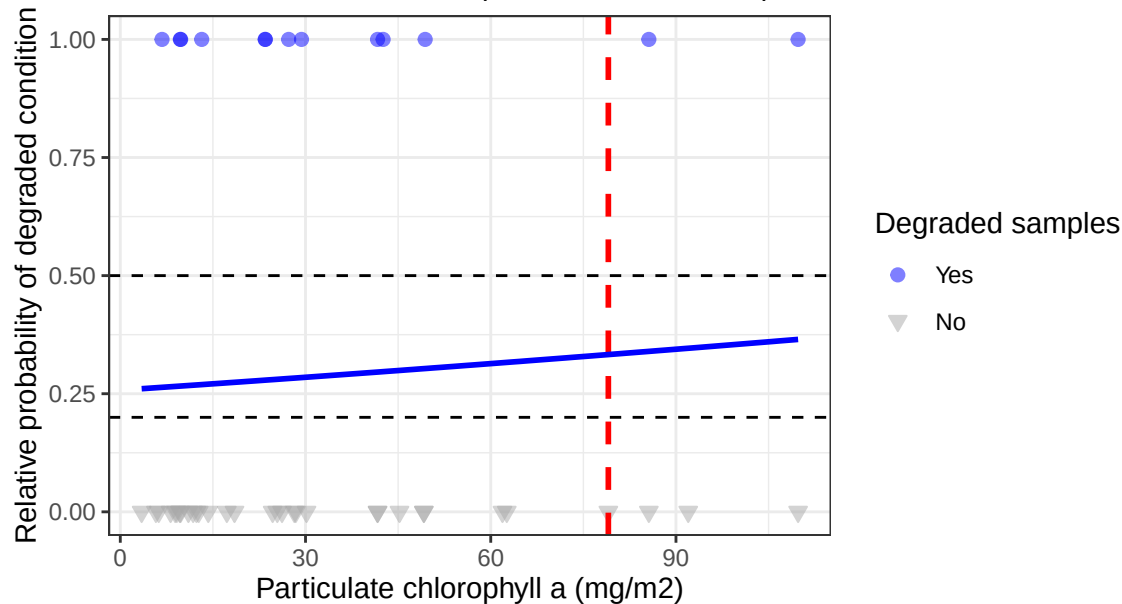

Observed stressor levels consistent with impairment where and when it occurs?

with higher CSCI scores and paired Chlor_a_particulate_mg_m2 data (n = 8).
Score = 1.

S01097: Stressor-response (logistic regression) line of evidence

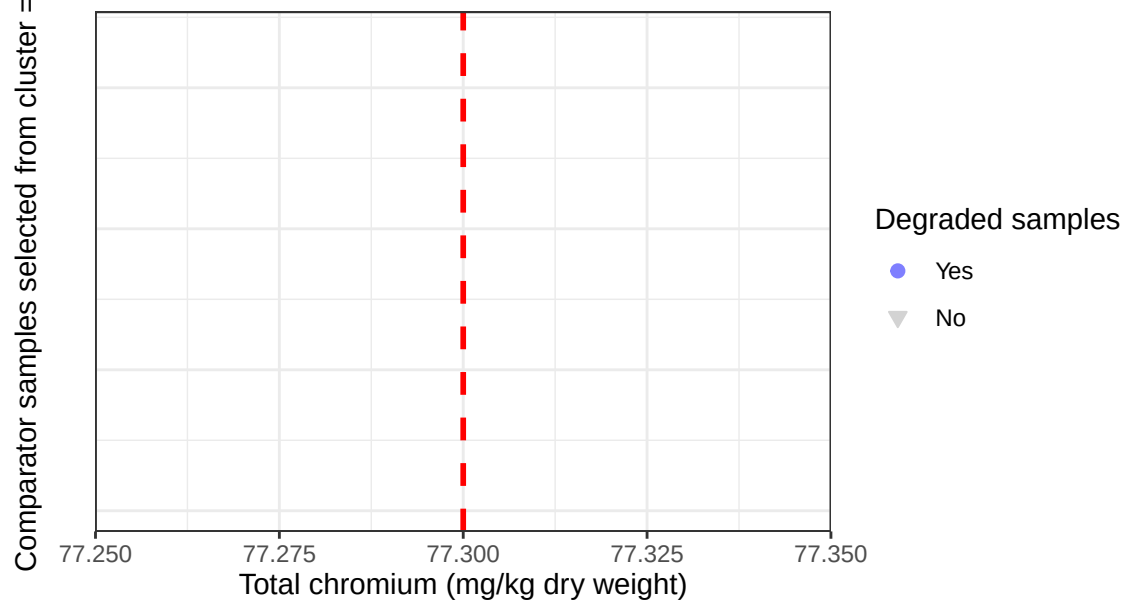

Are stressor levels sufficient to explain the observed impairment?

Comparator samples with CSCI and paired Chlor_a_particulate_mg_m2 data (n=45).
Score = 0.

902S01097: Co-occurrence line of evidence

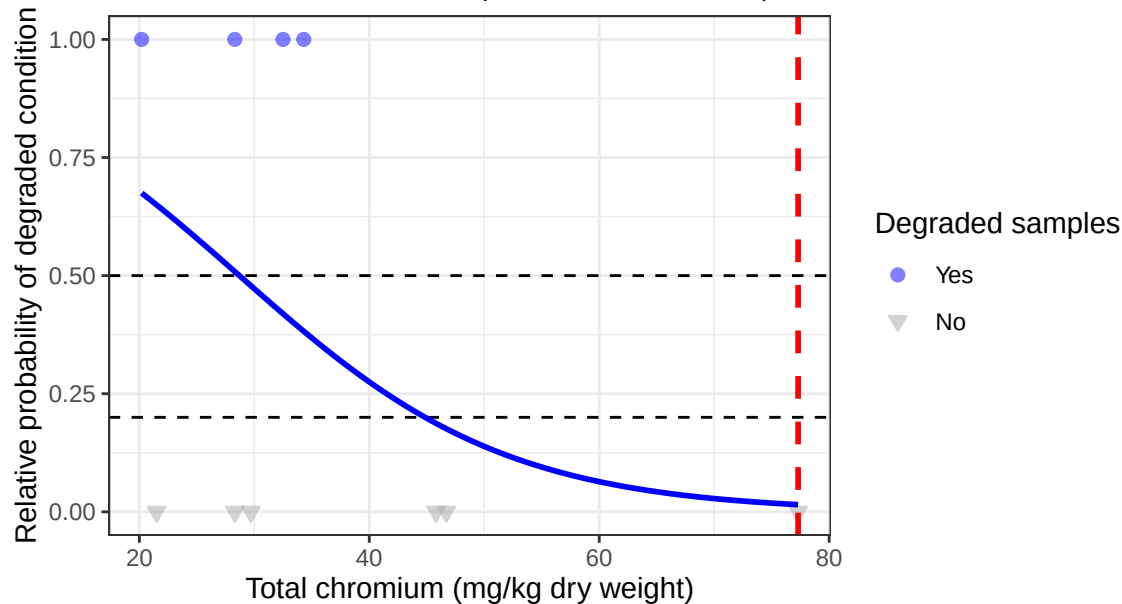

Observed stressor levels consistent with impairment where and when it occurs?

es with higher CSCI scores and paired Chromium_tot_mg_kg_dw data (n = 0).
Score = NA.

902S01097: Stressor-response (logistic regression) line of evidence

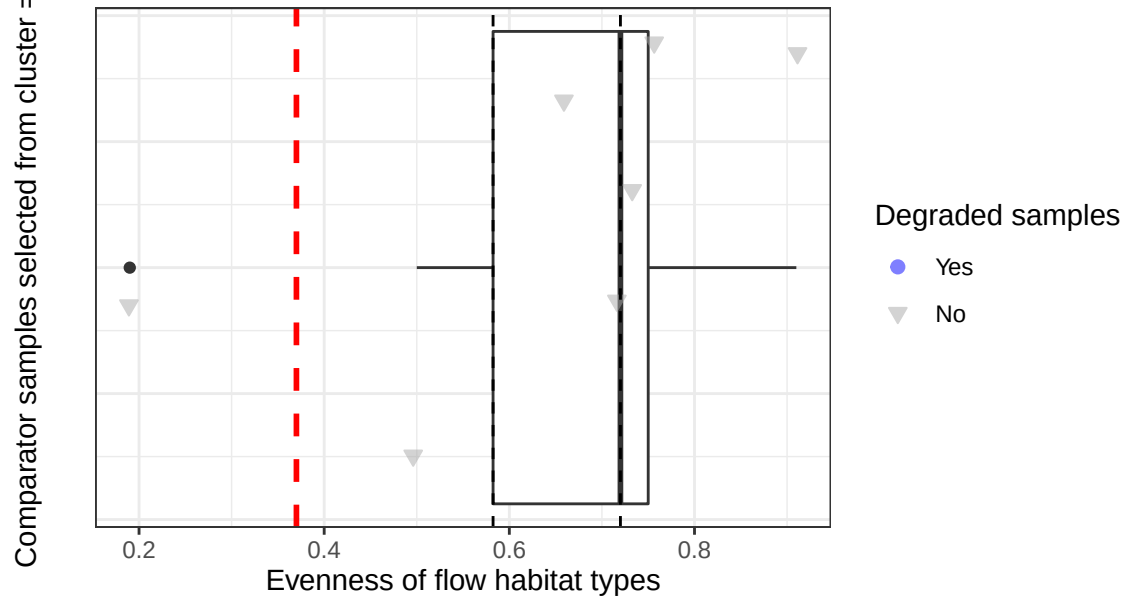

Are stressor levels sufficient to explain the observed impairment?

Comparator samples with CSCI and paired Chromium_tot_mg_kg_dw data (n=10).
Score = -1.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

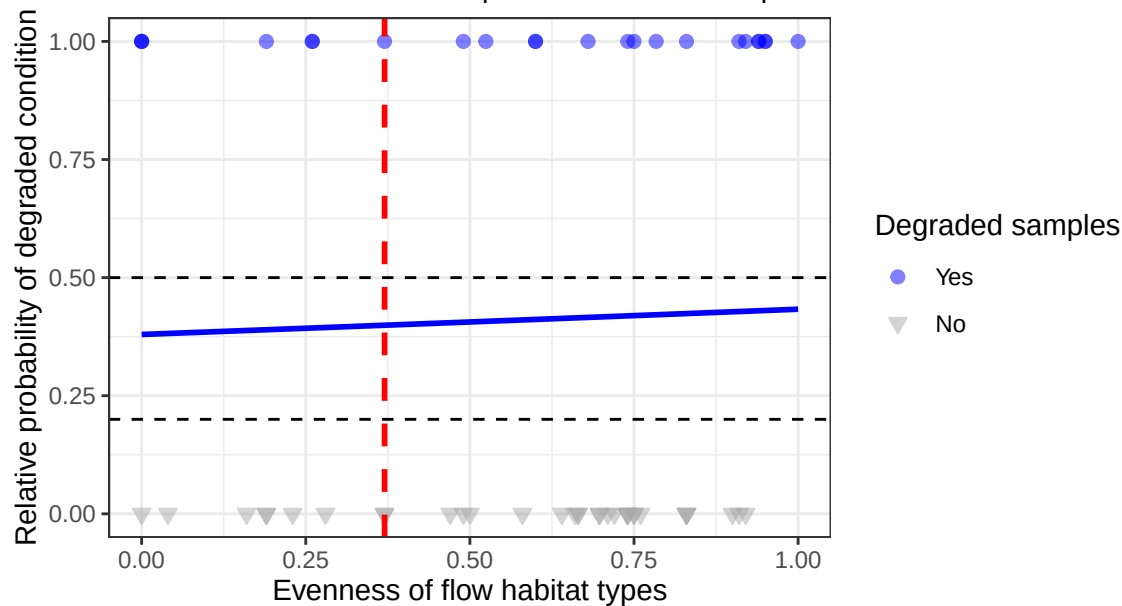

samples with higher CSCI scores and paired Ev_FlowHab_score data (n = 7).

Score = 1.

S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

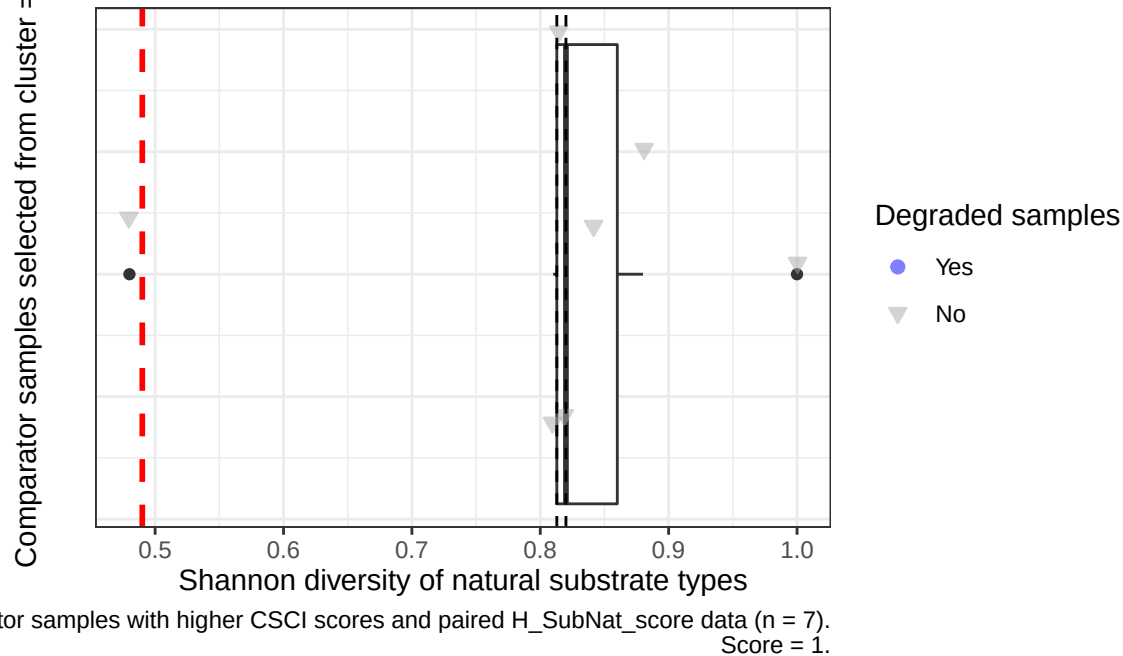

All comparator samples with CSCI and paired Ev_FlowHab_score data (n=56).

Score = 0.

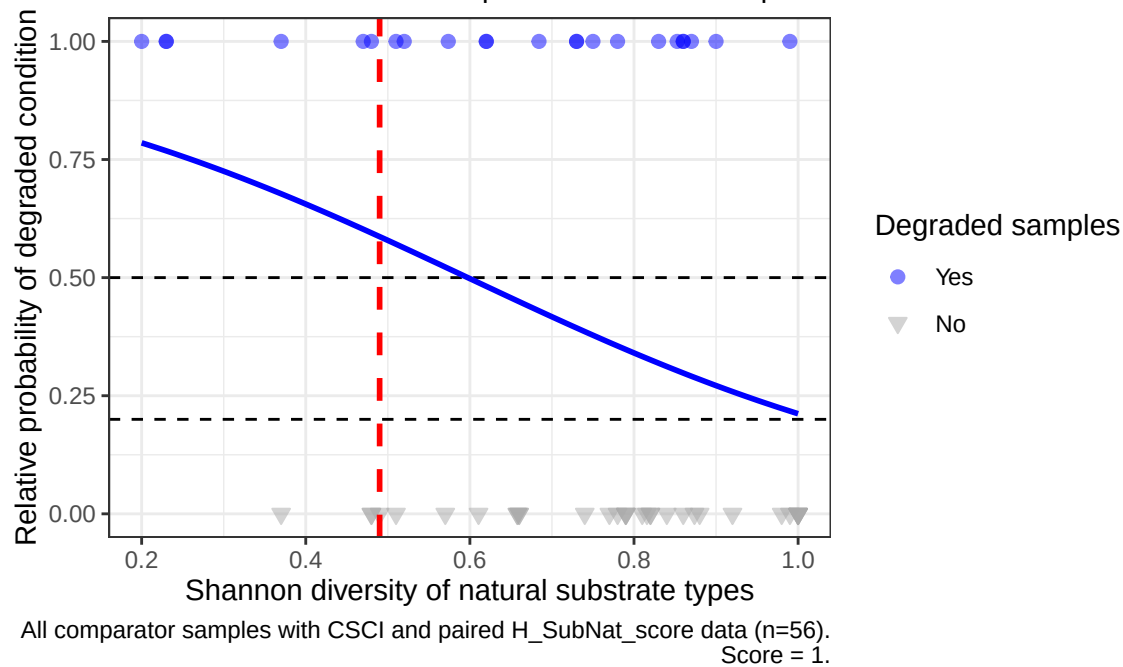

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

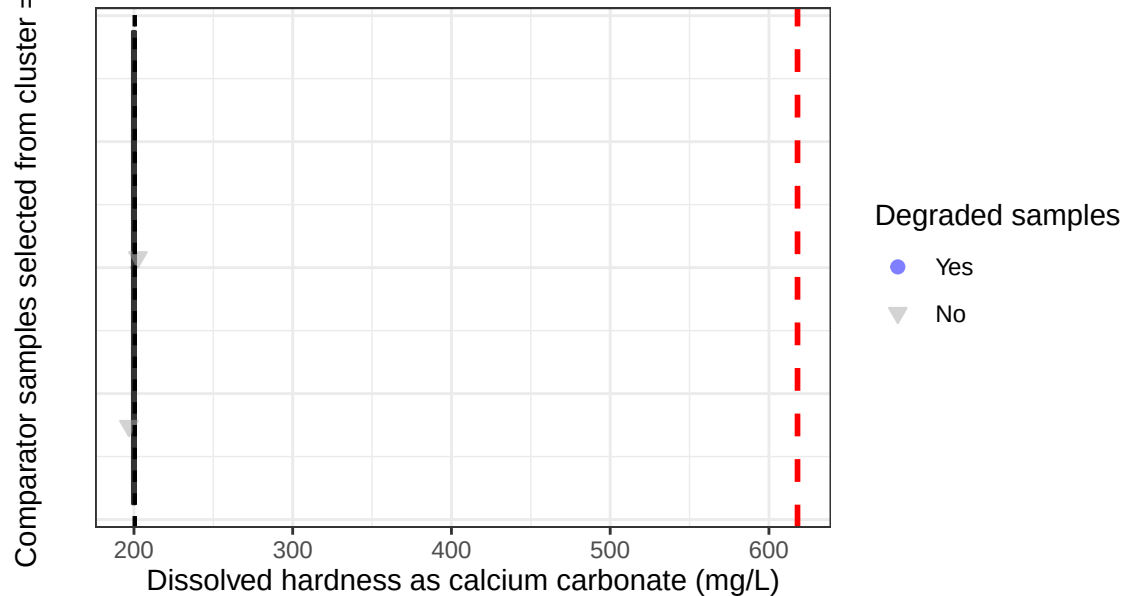

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

902S01097: Co-occurrence line of evidence

Are observed stressor levels consistent with impairment where and when it occurs?

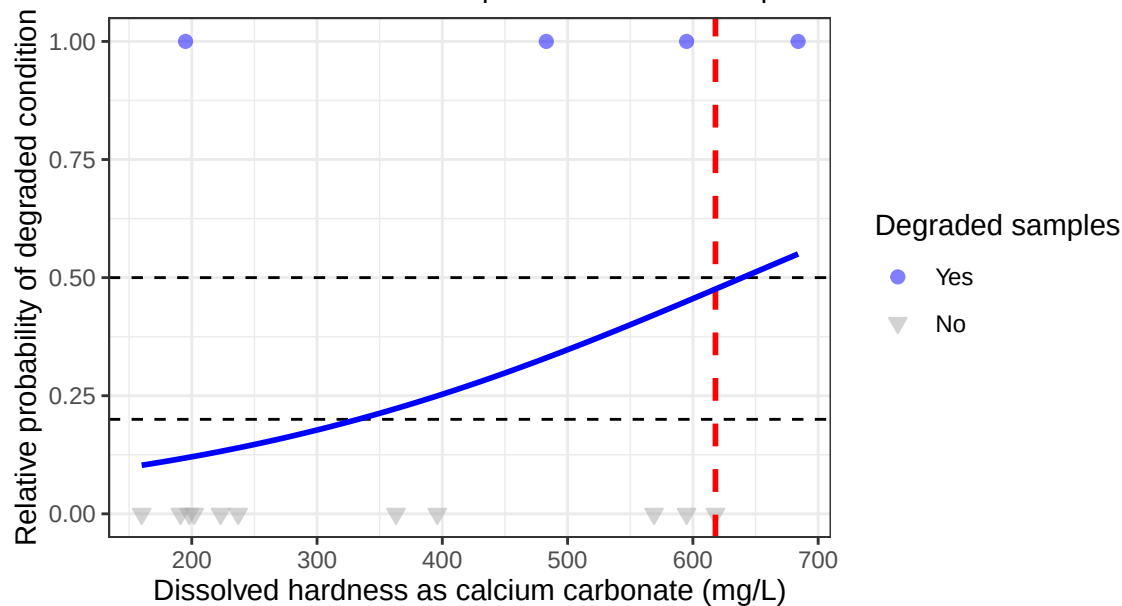

Comparator samples with higher CSCI scores and paired Hardness_CaCO3_f_mg_L data (n = 2).

Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

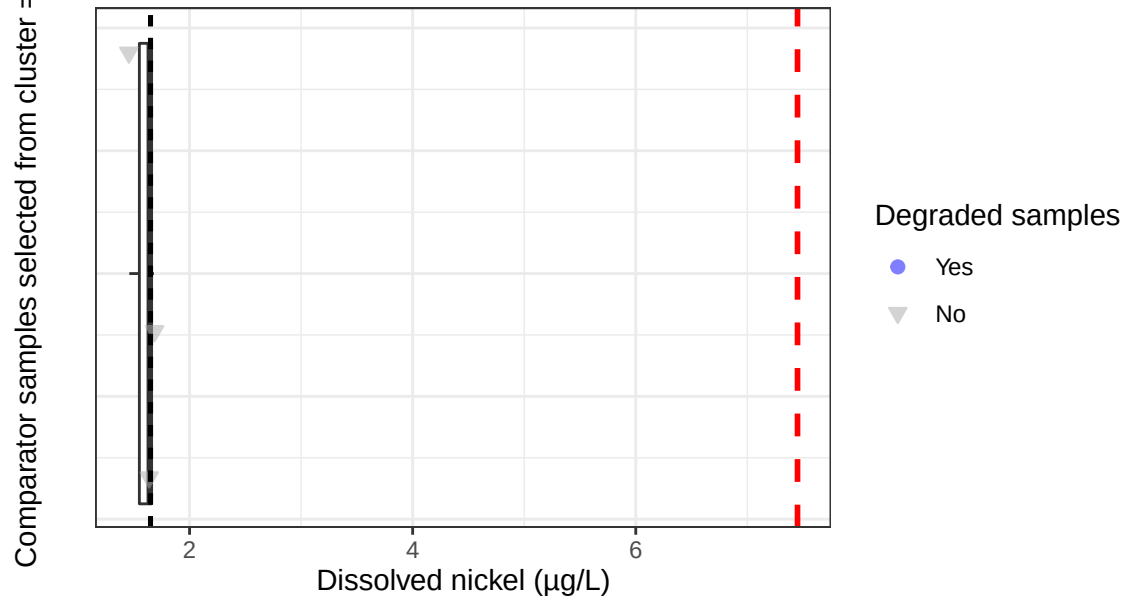

Comparator samples with CSCI and paired Hardness_CaCO3_f_mg_L data (n=15).

Score = 0.

902S01097: Co-occurrence line of evidence

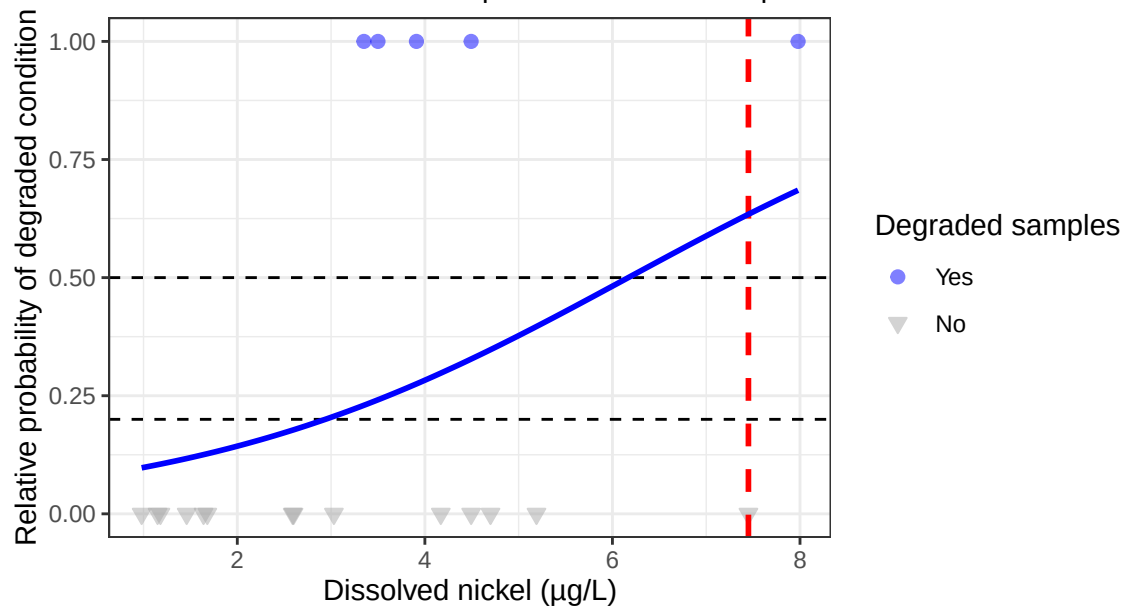

Observed stressor levels consistent with impairment where and when it occurs?

Comparator samples with higher CSCI scores and paired Nickel_f_ug_L data (n = 3).
Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

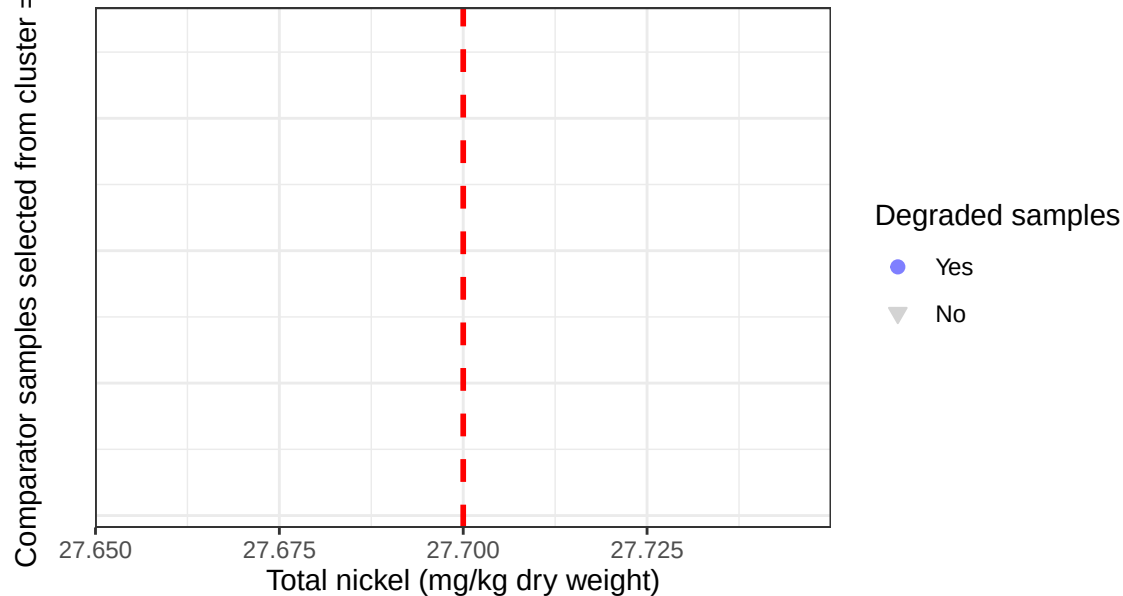

Are stressor levels sufficient to explain the observed impairment?

All comparator samples with CSCI and paired Nickel_f_ug_L data (n=19).
Score = 1.

902S01097: Co-occurrence line of evidence

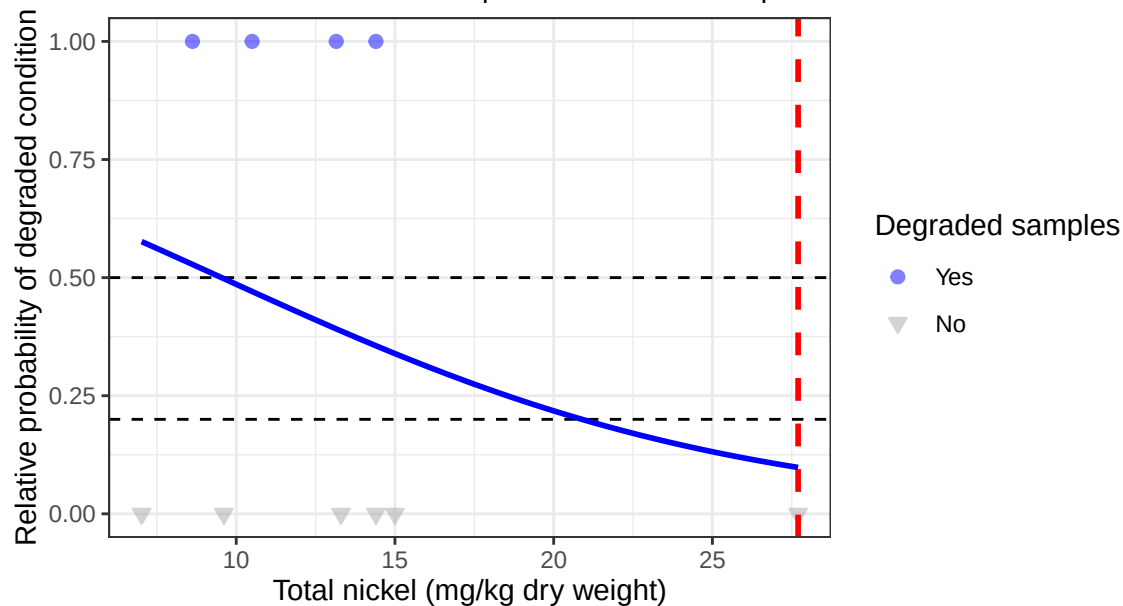

Observed stressor levels consistent with impairment where and when it occurs?

Comparator samples with higher CSCI scores and paired Nickel_tot_mg_kg_dw data (n = 0).
Score = NA.

902S01097: Stressor-response (logistic regression) line of evidence

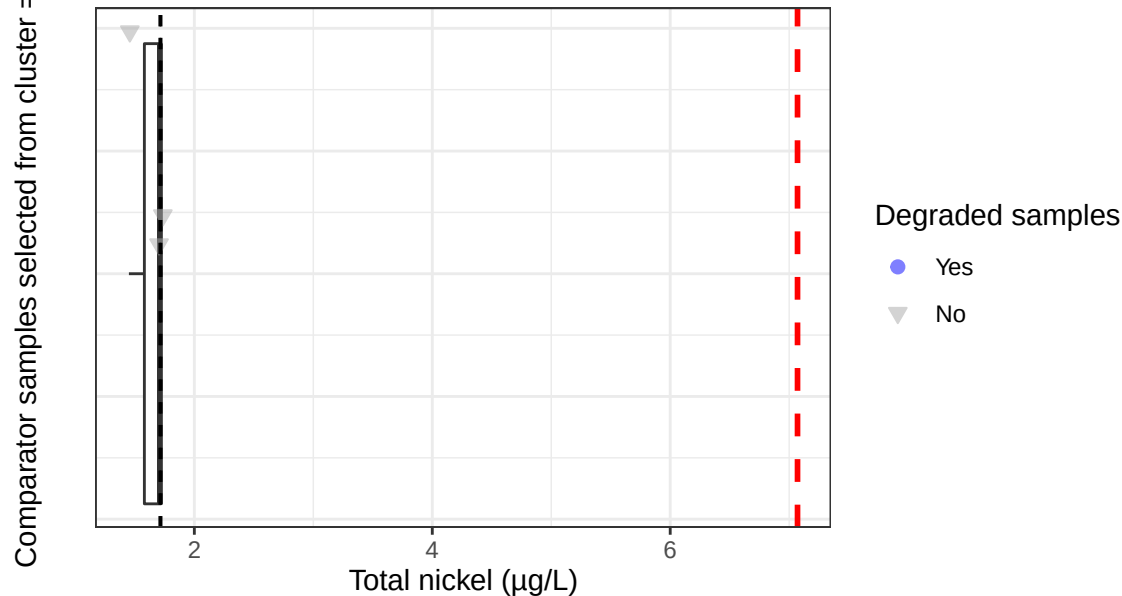

Are stressor levels sufficient to explain the observed impairment?

Comparator samples with CSCI and paired Nickel_tot_mg_kg_dw data (n=10).
Score = -1.

902S01097: Co-occurrence line of evidence

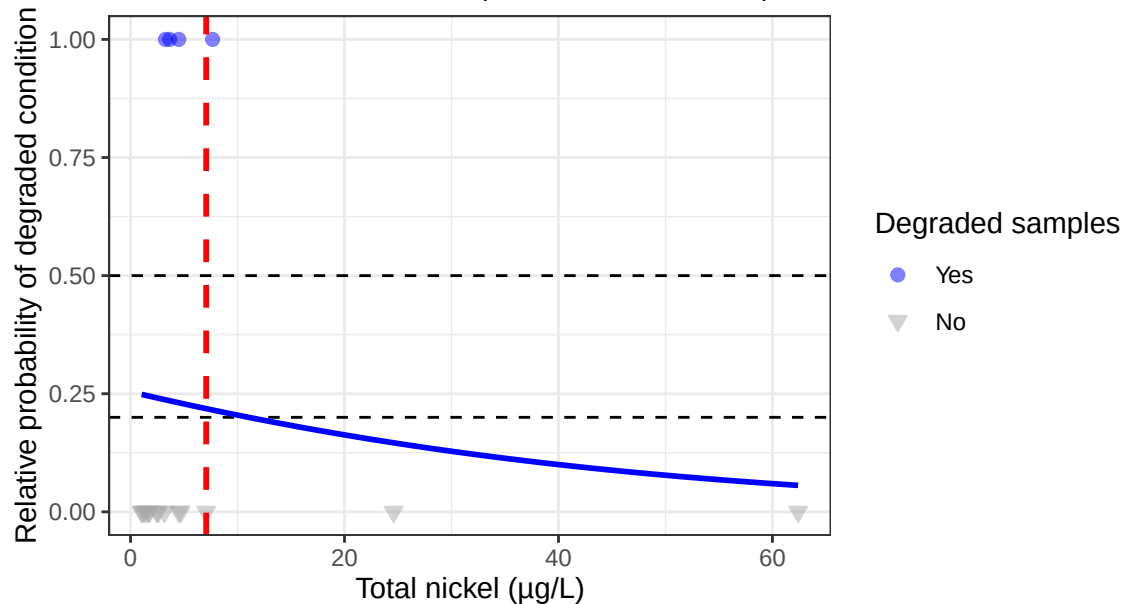

Observed stressor levels consistent with impairment where and when it occurs?

Comparator samples with higher CSCI scores and paired Nickel_uf_ug_L data (n = 3).
Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

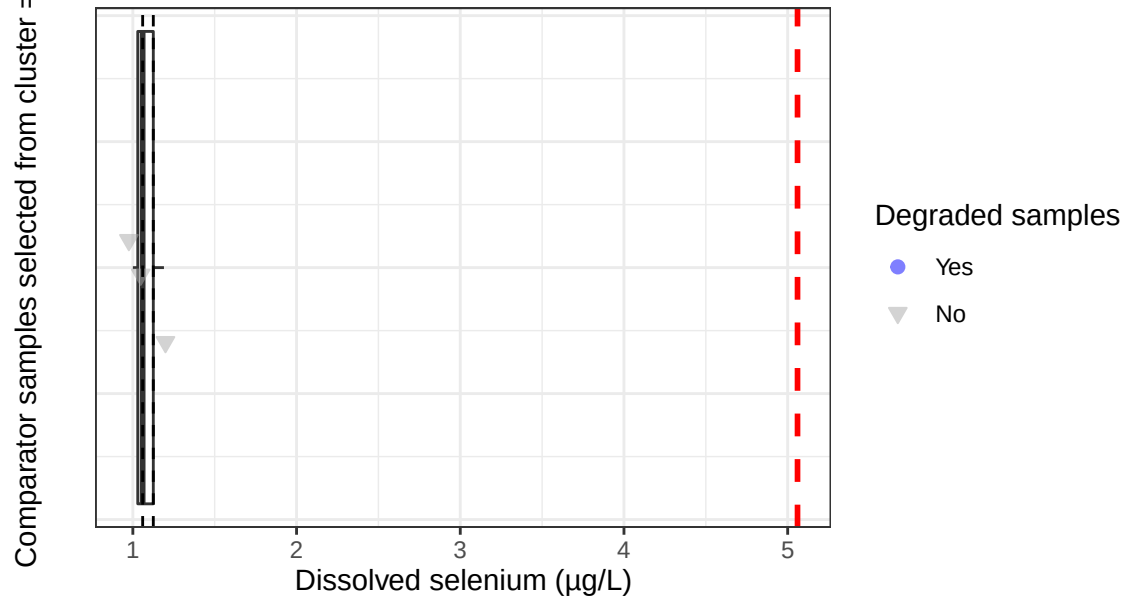

Are stressor levels sufficient to explain the observed impairment?

All comparator samples with CSCI and paired Nickel_uf_ug_L data (n=18).
Score = 0.

902S01097: Co-occurrence line of evidence

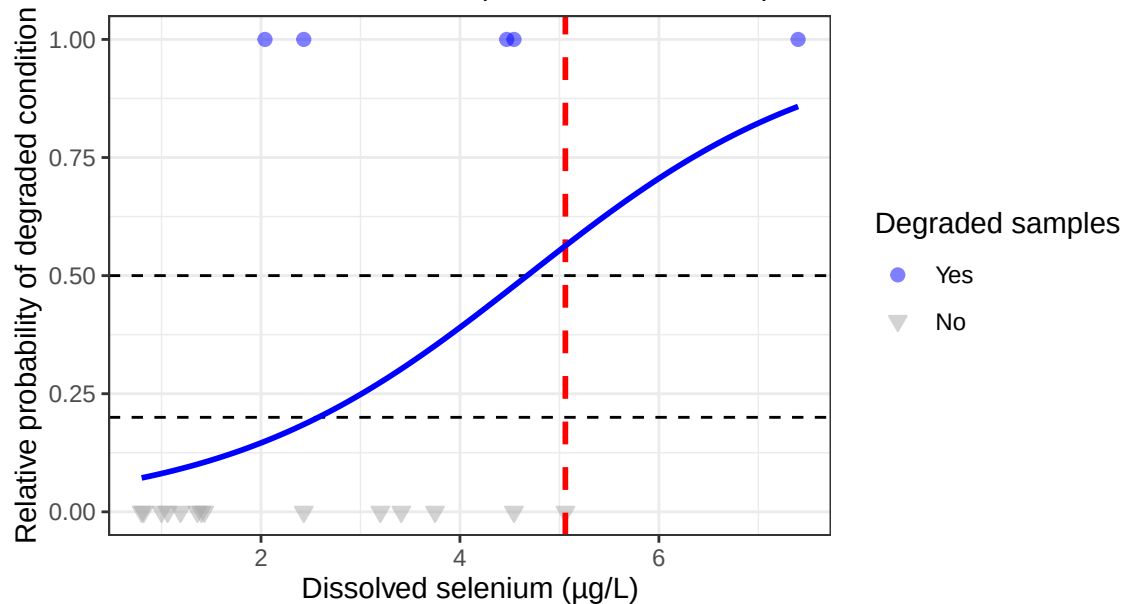

Observed stressor levels consistent with impairment where and when it occurs?

or samples with higher CSCI scores and paired Selenium_f_ug_L data (n = 3).
Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

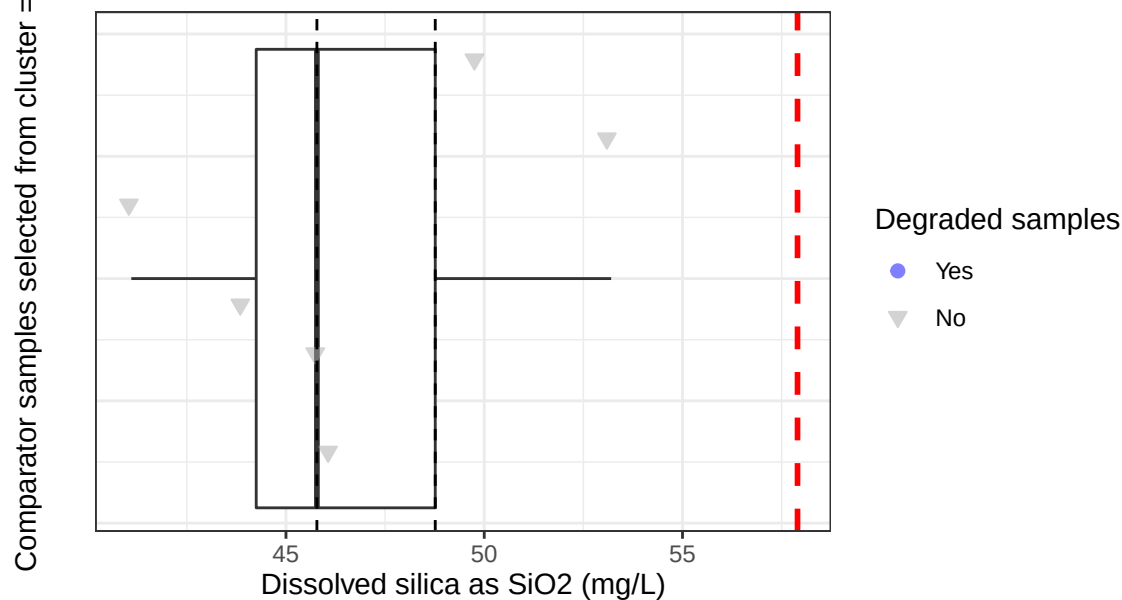

Are stressor levels sufficient to explain the observed impairment?

All comparator samples with CSCI and paired Selenium_f_ug_L data (n=19).
Score = 1.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

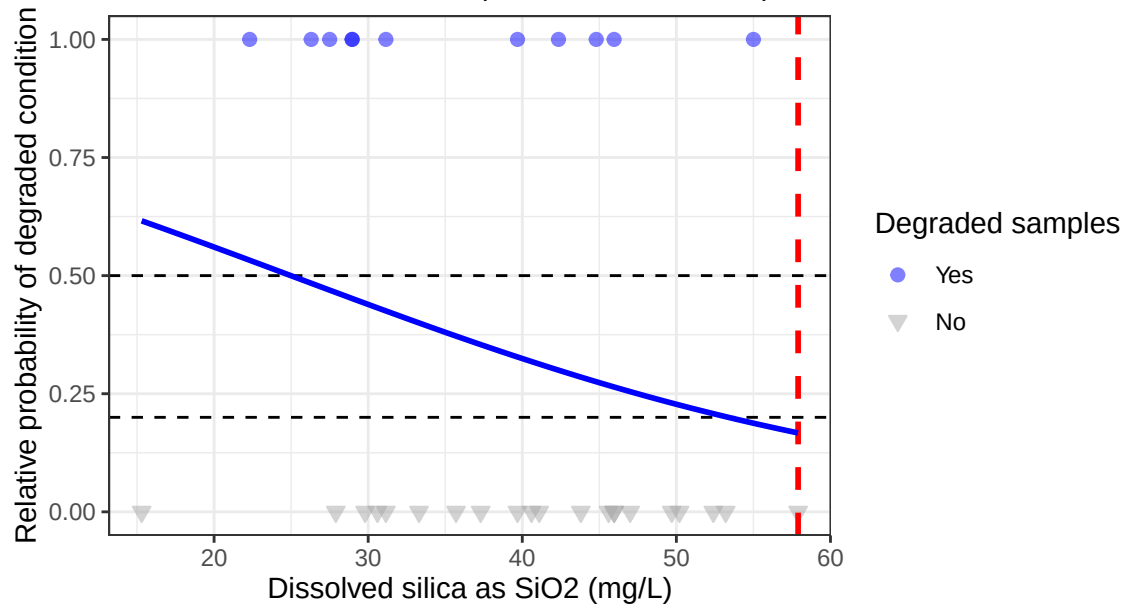

samples with higher CSCI scores and paired Silica_SiO₂_f_mg_L data (n = 6).

Score = 1.

902S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?

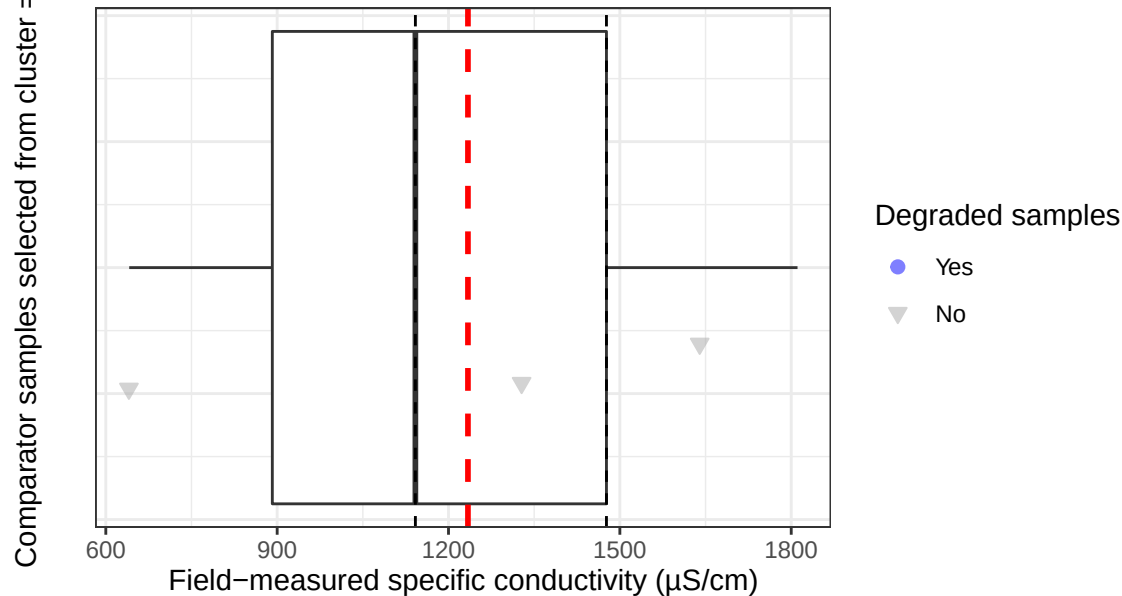

All comparator samples with CSCI and paired Silica_SiO₂_f_mg_L data (n=32).

Score = -1.

902S01097: Co-occurrence line of evidence

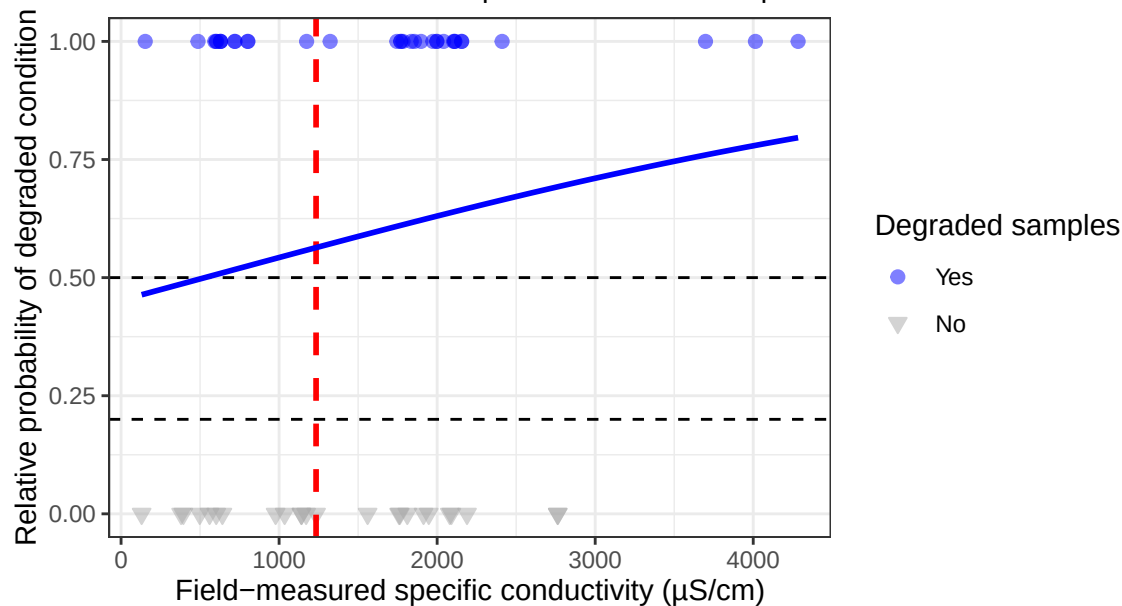

Observed stressor levels consistent with impairment where and when it occurs?

h higher CSCI scores and paired SpecificConductivity_fld_uS_cm data (n = 3).
Score = 0.

902S01097: Stressor-response (logistic regression) line of evidence

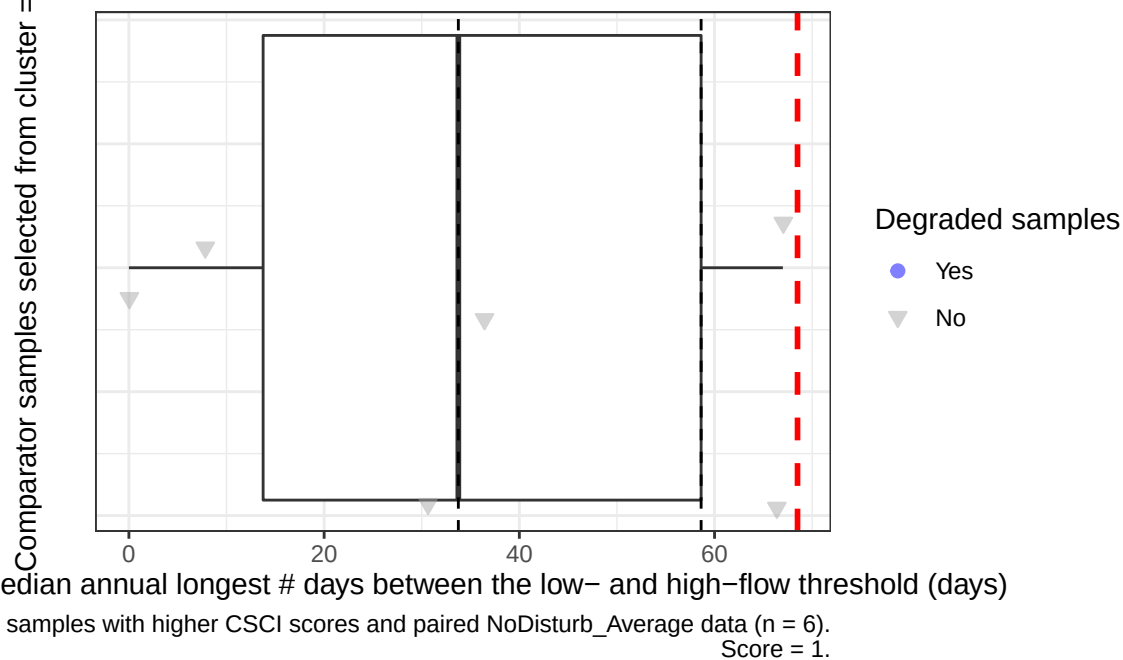

Are stressor levels sufficient to explain the observed impairment?

or samples with CSCI and paired SpecificConductivity_fld_uS_cm data (n=58).
Score = 1.

902S01097: Co-occurrence line of evidence

Observed stressor levels consistent with impairment where and when it occurs?

S01097: Stressor-response (logistic regression) line of evidence

Are stressor levels sufficient to explain the observed impairment?
